	24—Oliver L. Frisbee.

His Excellency the Governor and the Honorable Council then withdrawing, the Senate was called to order by Earle C. Gordon, clerk of the Senate of last session.

The clerk stated that the first business was the election of a temporary presiding officer.

On motion of Senator Greer, Senator Tufts was chosen temporary presiding officer.

The clerk requested Senators Greer and Snow (District No. 2) to conduct the temporary presiding officer to the chair.

Senator Tufts, having assumed the chair, on motion of Senator Greer, the Senate proceeded to the choice of a president by ballot, with the following result:

Whole number of votes cast.....	23
Necessary for a choice.....	12
Hon. Thomas F. Moran had.....	3
Hon. Leslie P. Snow had.....	20

and the Hon. Leslie P. Snow, having received a majority of all the votes cast, was declared elected.

Senator Moran expressed his appreciation for the complimentary vote given him, and, on motion of the same senator, the election of President Snow was made unanimous.

The Chair requested Senators Emerson and Moran to conduct the President to the chair.

The President, having assumed the chair, addressed the Senate as follows:

Senators:

To be selected to preside over the highest legislative body of one's state is a distinction that necessarily can come to but few men. I would seem to be entirely wanting in gratitude if I did not at this time acknowledge to you my deep appreciation of the exceptional honor which you have bestowed upon me. Mere words are inadequate to express fully my feelings. It will, therefore, be my aim, and hope, that by my devotion to your service during this Session I may be able to afford you more satisfactory evidence of my appreciation than can be conveyed by mere phrases.

I, however, accept the position to which you assign me with a deep sense of responsibility. We are in the midst of a period of reconstruction, a wave of wasteful extravagance has swept over the country and the world. The reaction is already here. Probably no session of the General Court of New Hampshire was ever confronted by more difficult economic and financial problems than now face us. Certainly no branch of the state government will be held to greater accountability by the people of the state of New Hampshire than the Senate as to the manner in which these problems shall be met. These problems cannot be solved either by a too ready yielding to plausible demands upon the state treasury, or upon the other hand by the denial of just or legitimate demands which the changed conditions and values necessitate. The solution calls for a high degree of discrimination which must be exercised without fear of either individual or public criticism.

I trust that each of us is willing to pledge the best that is in him to the service of the state in the solution of the problems to the end that every just demand may have fair consideration while the people shall not be burdened by any unnecessary appropriations; that no unnecessary laws be placed upon our statute books and the business of the state

in so far as the Senate goes, shall be consummated at the earliest possible date.

I wish to assure you that I shall endeavor to serve you impartially and to the best of my ability. I wish to beg your indulgence if I should seem at any time to fail in this purpose as it will not be intentional. Thanking you again for the splendid confidence which you have reposed in me, I await your pleasure.

On motion of Senator Moran, the following resolution was adopted.

Resolved, That Clarence S. Forsaith as clerk, be elected by acclamation; that Bernard B. Chase, as assistant clerk, be elected by acclamation; that William H. Knox, as sergeant-at-arms, be elected by acclamation; that Frederick W. Moore, as messenger, be elected by acclamation; that Frank D. Gay, as doorkeeper, be elected by acclamation; and that Clarence S. Forsaith, Bernard B. Chase, William H. Knox, Frederick W. Moore and Frank D. Gay are hereby elected for the several positions named, respectively.

Thereupon Clarence S. Forsaith, Bernard B. Chase, William H. Knox, Frederick W. Moore and Frank D. Gay, appeared and signified to their acceptance and were duly sworn to the faithful discharge of their duties before the President.

MINORITY REPORT.

*To the Senate and House of Representatives of the State of
New Hampshire.*

The legislature of 1919 passed a resolution as follows:

“*Resolved*, by the House of Representatives the Senate concurring. That we recommend the appointment by the Governor of a committee of twelve members to be chosen from both church and state in New Hampshire, to consider changing the Sunday Laws of the state, they to report with recommendations to the legislature of 1921 for consideration.”

In due time the members of the committee were appointed by the Governor, organized with a chairman and secretary, and gave notice of public hearings upon proposed changes in the Sunday laws. Two public hearings were held at the State House in Concord where all persons were heard who desired to express opinions upon the subject matter coming before the committee. The committee has had several executive sessions, the last being at the State House on Friday, December 31st, 1920, where the members of this committee discussed earnestly, but with the best of feeling, the evidence presented and any proposals of changes that came before them.

The discussion of December 31st developed that there existed among the members a very marked line of division, some feeling that no evidence had been brought forward of sufficient importance to warrant any change in the Sunday laws, and others feeling equally strongly that a change to

make Sunday observance laws more liberal was expedient. We use the word 'expedient' advisedly for the personal feeling among the members was nearly, if not quite, unanimous that it would not be well to make a more open Sunday. Some of the members felt that there was a pressing demand for some more liberal law, and therefore subordinated any personal feeling they had to the alleged necessity for new laws for Sunday observance to serve the public welfare. We propose to examine the reasons given for proposed changes and submit our reasons why these arguments have not convinced us of the necessity or advisability of any change. The burden of proof in this case is upon the proponents of the attempt to modify the present Sunday law in various ways. The Sunday laws of New Hampshire as now upon the statute books represent a long established and settled policy in the matter of the Sunday observance and this policy so long settled and established should not be departed from without very substantial reasons.

The following motion was made before the committee and voted upon after some discussion:

"Resolved, That this committee recommend to the Legislature that no action be taken by it to liberalize the present Sunday laws of the state."

The members of the committee who subscribe to this report voted for the above motion and it expresses their convictions that any change which will make Sunday a more open day is not demanded by any large number of people, would not make conditions in the state better, and would be detrimental to the best interests of this state.

Many arguments were advanced by those who appeared before this committee for the proposed change or changes and the advocates of such changes could not themselves agree what modification would best remedy the alleged evil conditions existing and would best serve the interests of the public. We listened to these arguments but they did not convince us of the necessity or wisdom of a change. We do propose to examine the most important of them.

(1) It was urged by men of ability that the present Sun-

day law violates the personal liberty of the individual; that they restrict him in the exercise of certain fundamental personal rights; that their evident purpose and design is to force the individual to attend a church and to restrict therein his freedom in the exercise of his religious prerogative, and that no legislature has the right to enact such laws. Why, it is asked, should not a person be allowed to do as he pleased on Sunday within certain limits as well as on Monday? If amateur baseball is allowed on Saturday, the last day of our week, why should it not be played on Sunday, the first day?

We think that those who hold to such ideas have not read carefully the history and purpose of these statutes of New Hampshire. They are of long standing and a discussion of their history is given in *George v. George*, 47 N. H. Rep., page 27. Their legality has been interpreted in various court decisions of New Hampshire. Various questions relating to the Sunday law have been before the Supreme Court of this State but so far as appears no person had the courage to argue before that body, at least successfully, that the legislature had no power to enact them. It has always been regarded as a question of expediency for that body and these laws thus enacted have never been held to be any more derogatory to the personal liberty of the individual than many laws that we obey without question.

It does not seem to us that the present N. H. laws are of the character and design alleged by those who advocate the change. It is the policy of progressive status to set apart Sunday as a day peculiar in itself—as a day of quiet and a day when those who desire to worship, whether by church attendance or quiet meditation at home, may be secured in that desire. Those laws do not summon our people to worship. This obligation is usually left to the conscience of the individual. They do enjoin certain acts upon that day which tend to disturb or annoy those who worship. This purpose is well described by Judge Fellows of our Supreme Court when he said in the case above cited at page 34:

“The changes introduced by the Revised Statutes was

designed to withdraw all legislative control over the acts and conduct of the individual citizen, so far as they did not interfere with the public observance of the Lord's Day—wisely holding that in respect to acts of a private nature not calculated to disturb others in the exercise of the appropriate duties of the day, the individual conscience alone should decide. At the same time we perceive no intention to diminish the restraints upon those unnecessary worldly acts which interfere with the public observance of the Lord's Day; and therefore such acts when done openly or publicly in the presence of others are prohibited, because they are calculated to turn the attention of those who are present, from their appropriate religious duties to matters of mere worldly concern, and thus to disturb them in the sense in which the term is used in the statute. The policy of the act is still to encourage the due observance of the Sabbath, as a day of rest from worldly labors and traffic, and of devotion to religious duties; and although it is left to the conscience of each citizen to decide whether he shall himself in private perform any secular labor, he must take care to do no such labor in a manner to turn the attention of others from their appropriate duties and fix it upon worldly business or traffic. The purpose is to give every citizen an opportunity to discharge the religious duties incumbent upon him on that day, without being disturbed, or having his attention withdrawn, by the career of worldly traffic or labor; * * *

The intent and purpose of those acts is also discussed by Chief Justice Gilchrist in *Varney v. French*, 19 N. H. Reports, page 233, on page 236. He there says:

“This provision aims only at protecting the public in their devotions and religious reflections; others, the law says, shall not be disturbed. It leaves each individual to employ himself as he may choose, subject only to this limitation. It does not aim at guarding him from himself. It does not seek to interest him in religion, by forbidding him to interest himself in things not religious. It leaves him to his own conscience, and does not attempt to furnish

any other guarantee for the religious and devotional employment of his time, than such as may be afforded by his own views of his religious obligations."

We have quoted at length from these opinions because they bring out so clearly the character of this legislation. It does not operate upon his conscience, it restricts him in his acts, for the purpose—and for that only—of protecting and guarding those who feel that Sunday is meant for some other purpose than the enjoyment of worldly pleasures and the performance of week-day tasks.

Any proposed legislation which we have seen would break down these restrictions, sweep away the barriers erected by those who have preceded us, and would be the first attempt to open up Sunday to sports, games, moving-pictures and the like, which have no place in a quiet and rational Sunday observance. We are convinced that New Hampshire is not yet ready to take the step which has been taken by other states to take from Sunday its rightful place in the week, and to make it merely a day like all others.

(2) Some evidence was introduced before us that the change is desired by the cities, and that if no change was made, great evils must result. We were told that in a certain city in the state there are many radicals, who in the enforced quiet of a Sabbath day, congregate in dark corners to plot the downfall of the state: that a permission to those people to play an amateur game of ball between two and six of a Sunday afternoon is a sure relief to all their alleged ills.

It seems to us that such an argument cannot be earnestly made. The centers of lawlessness in this country are not in those states where there is still some sane form of Sunday observance, but in the great and congregated centers of population where Sunday is only one day like the other seven, where base-ball, amateur and professional, is allowed; where races of all kind take place, and where in short, the distinction between Sunday and the other days of the week, to which distinction New Hampshire still adheres, has been thoroughly broken down. The unrest among those radical

inhabitants in a certain New Hampshire city, if any exists, is not due to the strict enforcement of Sunday laws, and it will not be cured by breaking down the long established custom of New Hampshire with respect to Sunday observance.

(3) We were told by able speakers that the mill worker or factory man insists upon games and sports on Sunday, because he has no other time to enjoy himself. He works in the mill and factory on other days, why not make Sunday a real day for him, where he can have some relief from the grinding duties of the week? Whatever right such an argument may have once had, it can have but little now. The hours of all employees have been radically shortened in recent years. No one works Saturday afternoon, many shops close at five every night in the week. Every city of the state has its Sunset League games, every city of the state has—or could have if it desired—its Saturday games. One-third of the week is given up to work, one-third of it to sleep, and there surely should be time enough in the other one-third for such play and relaxation as is necessary for the human body and mind. A canvass of the situation showed that perhaps three or four cities might, under local option, accept the provisions for amateur games and sports. If this is so, the demand for a change is not widespread, and not a reason why there should be placed upon the statute books of this state, a law overturning a settled and established policy of Sunday observance.

(4) The advocates of change maintain that the present law is unenforceable in its present form, and that the proposed law or laws only enact into statutes what is now done without the sanction of law, in this state. This assertion we deny. So far as the statement refers to certain work now done which was not done in prior days, and to sales made on Sunday of certain articles such as sodas, cigars, newspapers, gasoline, and like articles, we must admit that there is no legal sanction for many such acts. But there is no widespread desecration of the day by Sunday sports, amateur or otherwise. We regret the more or less widespread practice of opening certain stores on Sunday, for the

sale of newspapers and other articles above mentioned, without legal sanction, and if the movement were merely to cover such acts and to give a legislative interpretation to the Sunday work law, to meet present day conditions, we do not feel it would be objectionable. But such a movement has always been joined with proposals to open up the day for Sunday sports, and to our mind we had far better retain the present law, even with its admitted imperfections, than to make Sunday, by the proposed changes that came before us, a day which has lost its long established purpose and meaning. Better keep our present statute, than to drive in the entering wedge that will end in making Sunday what it has been in Europe—a day not different from other days except by its excess of pleasure.

The country has been passing through a critical stage. During the war, everything was subordinated to winning the war, and we came to look with only mild concern upon many things that before we would not tolerate. War shakes the moral fibre of any people, and we are today feeling the effects of this moral breakdown in ways too numerous to name. Such a condition follows every war. It came in the late sixties as a result of the Civil War. It came in 1819–1820 as a result of world disturbances that ended in 1815, and of our own war of 1812. The way to meet these days is not by loosening and relaxing the restraints that the passing of the years has shown advisable. These conditions demand some measure of restraint, of sternness if you will, and a determined stand on the part of us all to check those tendencies of the time which cause us some alarm. This is no time to break down the gates, but rather to hold them fast. The times are not normal, and one of the crying needs of the day is some time for sane, sober, and quiet thinking. No one has pointed out to us a single nation that can trace its decay to a strict adherence to the principles that have, in this state, governed Sunday observance, but it is easy to name those whose decadence, was marked, among other things, by a wider and wider departure from the true spirit and purpose of the day. We cannot consent

to recommend what we feel would break down, beyond repair, those principles of wisdom and sanity that long years have determined to be those which should govern our observance of Sunday for the best interests of ourselves, of our community, and of our state.

In explanation of the reductions made in estimates for the biennial period 1921-23 the following is submitted:

1. A detailed study of salaries was made and reductions were noted in every individual case in which it seemed possible to lower the estimated salary rate and retain the services of members of the staff. These reductions, in many cases, bring the salary rate considerably below salaries that would have to be paid in order to bring competent instructors in to replace present staff members. The salary schedule is considerably below that of institutions of our class throughout the country.

2. All estimates for equipment, supplies, and wages were re-studied and allowance made for possible reductions in prices running from five per cent to fifty per cent, in some instances. However, it was found necessary to increase the estimates previously submitted. This was particularly true of coal, transportation, electric power, and certain special equipment.

3. The estimates for repairs and replacements were reduced \$9,000.00 the first year and \$10,000.00 the following year by allowing for possible decreases in prices of materials and wages and eliminating some items, such as painting and repairs to floors, which while seriously needed are not imperative.

4. Reductions of \$6,000.00 a year were made in the estimated costs of miscellaneous improvements by allowing for possible decreased prices in materials and labor; also by postponing certain projects which are sorely needed but without which we shall be able to continue the college work,—such items, for instance, as expansion of the plumbing facilities in the gymnasium so that the number of shower baths may be increased. We now have six showers and approximately six hundred men.

5. The matter of postponing a request for money with which to purchase land was carefully considered by members of the board of trustees. It was decided that the need was so pressing and the opportunity for securing the land so peculiarly advantageous that this item should properly be presented to the legislature.

6. It was impossible to determine whether or not any reductions could be made in the estimated cost of the heating plant. The architect and engineers are now studying their estimates in detail. Careful consideration has been given to the advisability of postponing our request for a new heating plant, and again, in the judgment of the members of the board, the need is so imperative that it was decided that the matter must go before the legislature in justice to the college and state interests. The present heating plant is inadequate, badly run down, and abnormally expensive in operation.

7. The original estimates for funds for the agricultural extension service were reduced by eliminating provision for several specialists that are absolutely needed if the college is to meet the demands now being made upon it.

8. The reductions in the amounts estimated as necessary for the agricultural experiment station are brought about by eliminating all proposed new projects. The \$5,000.00 the first year and \$7,000.00 the second year will be necessary in order to provide a fund with which to publish results of research that has been in process some time and which we have been unable to publish. It will also provide a small amount of absolutely essential additional equipment and will be applied in small salary increases which are essential in order to keep our salary schedule on the same basis with other salary adjustments within the institution.

The above reductions have been made upon the assumption that the promised reduction in prices will materialize. If this does not occur the estimates made will not be adequate to carry the college through the biennial period.

All expense incurred in providing and maintaining such suitable protection of all persons at said crossings shall be apportioned by the public service commission between the two roads as they may deem just; and in all cases, unless otherwise ordered by the commission, when a street railway crosses a steam railroad at grade, every driver of a car upon the street railway shall, when approaching the point of intersection, stop his car not more than seventy-five feet and not less than twenty feet from the crossing, and before attempting to cross carefully examine for approaching trains on the steam railroad, and shall not proceed to cross until it is ascertained that no trains are approaching, and that the street railway car may cross with safety. Whenever it shall be necessary to repair, alter or rebuild a bridge or construct a new bridge, upon a public highway, and said bridge is, or shall be used by a street railway, the expense of such repairs, alterations, rebuilding or construction may be apportioned equitably, as the public good may require, between the town incurring such expense and such street railway, by the superior court upon petition brought therefor by the town, unless the said town and the said street railway shall agree upon such apportionment. Upon petition of a street railway company whose tracks cross the track of a steam railroad at grade, or upon petition of a steam railroad company whose tracks have been crossed at grade by a street railway, the public service commission may review the apportionment of the expense incurred in providing and maintaining suitable protection of all persons at any such crossing as provided in this section and may make such new order of apportionment or such order requiring either company to defray the entire expense of providing and maintaining such protection as said commission may consider just and reasonable, having due regard to the nature and extent of the hazard caused by each company against which such protection is needed and the nature and extent of the benefit if any, which each company derives from such protection.'"

RESIGNATION OF THE PRESIDENT.

President Snow addressed the Senate as follows:

Senators:

There are mile-stones in the lives of all of us. I am at the point of passing one of the most important in my life.

It is the natural and legitimate ambition of a lawyer sometime to serve his state upon one of its highest judicial tribunals. Personally, I can conceive of no more welcome distinction that can come to a man of my profession. Such service is the natural fruition of an attorney's life. This preferment, as you know, has now come to me by the appointment of the governor of our state. I esteem my selection for such service as an especial honor, coming as it does without solicitation on my part.

I am not unmindful, however, of the high standard which has been set for me by my predecessors in this office. The state of New Hampshire has preserved its method of selecting its judiciary by executive appointment, while some other states have subjected the office of judge to the vicissitudes of politics in popular elections. Our method of selection, I have always believed, is responsible, in no small degree, for the high character of the men who have sat upon our bench. We have had a line of men who, for integrity, fair-mindedness, and legal ability have compared most favorably with the judiciary of any of our sister states.

The high standard which has thus been set in this state may well give pause to the aspiring attorney. It is one thing to be a successful lawyer,—it is quite another thing to become an able jurist. In other words, there is a goal yet to be attained beyond the mere appointment to the bench. This goal can be reached only by hard, conscientious work. I can only say that it will be my great ambition and my determination in so far as it lies in my power to justify the judgment of His Excellency and the Honorable Council in placing me in this distinguished line of succession.

The acceptance of a position on our courts and entrance upon judicial service makes it necessary that I withdraw from the political offices which the people, and my associates, have presented me. Let me assure you that it is not an easy task for me to resign the presidency of this body with which you have especially honored me—and this I say entirely apart from the fact that the position carries with it the lieutenant-governorship of our state. Such is my regard for the gift of this office at your hands and for my duties to the state. I do not believe that I could bring myself to the point of relinquishing the office, even to accept a call to this higher service, except for the fact that, so far as can now be foreseen, the presidency has no further active duties for me to perform.

As I surrender the gavel at the close of our active duties, I look back upon the session with much satisfaction. When

I entered upon my duties as your presiding officer, it was my ambition to have and to preserve the confidence and esteem of the members of this Senate, irrespective of political or other affiliations. I feel as though my ambitions in this regard had been fully realized. At all times I have had the splendid and loyal support of all my associates.

I desire to say a word in commendation of the fine spirit of service and co-operation which has existed in this Senate throughout the session. Discussions have been conducted always in a manner consistent with the highest courtesy. Each member has been considerate of the feelings of his colleagues. With all our differences of opinion as to the merits of measures which have had our consideration, I know of no incident which has left any bitterness. During our trips of inspection of the state's institutions, and during the leisure hours between sessions, there has grown up a genial comradeship which could not have been excelled, and which, I trust, will not only be held in pleasant recollection, but will from time to time be renewed as opportunity offers.

The only sad feature of this occasion is the one vacant chair. While absent from our councils during the closing weeks and from our future reunions, I am sure Senator Daniels will always be present in the recollections of all of us. I know of no language that better pictures him to us as we knew him than that which has been written into our records "his sense of humor, his keen wit, his genial smile and cordial greeting and his brotherly kindness endeared him to us all."

In behalf of myself and my colleagues, I want before leaving this chair to thank our attachés for their uniform devotion, faithfulness, and courtesy.

In tendering my resignation as your presiding officer—the highest political honor that ever came to me—I want to express to you, my colleagues, my appreciation for your indulgence as I have endeavored to serve you in the guidance of your deliberations. The gracious consideration of every

member has made the performance of duty a pleasure and a most enjoyable climax in my brief political career.

I tender you my resignation as President.

LESLIE P. SNOW.

Whereupon the clerk of the Senate assumed the chair and asked the senators their pleasure in regard to the resignation.

On motion of Senator Garland the Senate voted to accept the resignation.

The clerk then stated that the next business was the election of a temporary presiding officer.

On motion of Senator Parker, Senator Whittemore was chosen temporary presiding officer.

The clerk requested Senators Parker and Gage to conduct the temporary presiding officer to the chair.

Senator Whittemore having assumed the chair the Senate proceeded to the choice of a president to fill out the unexpired term of President Snow.

Senator Emerson addressed the Senate as follows:

Mr. Chairman and Senators:

For fifteen weeks we have been intimately and pleasantly associated in this chamber. We have had our differences of opinion relative to matters before us, but these differences have left no rancor in the minds of any of us. Memory of these days will remain through life as a precious heritage. We are now approaching the end of this service and are about to settle the last great question which it will be ours to solve.

It would ill befit us if we did not turn aside for an instant at this time to mention our retiring President, who by his eminent fairness, his great ability and his uniform courtesy has enshrined himself in our hearts and we extend our congratulations to him on his accession to the highest position the state has to give in the line of his profession.

We now turn to the selection of one of our number to elect in place made vacant by the elevation of our President, that one to hold the position of President of the Senate for the remainder of the term of two years.

It is altogether fitting we should act with unanimity in this selection, so that so far as is humanly possible, there should remain no vestige of contest or of disappointment in the mind or heart of any senator, forgetting our differences of political belief, forgetting forever our differences of opinion on matters we have been called to decide and acting as one man.

In settling this question we are not unmindful there are many of our number well fitted and available for our choice and whom we would be proud to elevate to this most honorable distinction, yet out of our wealth of available material we have all turned to one of our number who by his clear thinking, terse expression, scholarly attainment and unbounded courtesy has specially endeared himself to all of our number, who has rendered most valuable service to the state of New Hampshire in both legislative chambers of the state house, proving beyond all peradventure he would grace the position to which we are about to elect him.

It is entrusted to me, first to make public expression of our unanimous support of this senator for this position, and I, therefore, move, Mr. Chairman, that our retiring President as a last fitting act in his capacity as a senator, cast the vote of this Senate for the honorable senator from District Number Twenty-three, James A. Tufts, to become our President.

Whereupon Senator Leslie P. Snow cast the vote of the Senate for Senator James A. Tufts as President.

The chairman requested Senators Orr and Winant to conduct President Tufts to the chair.

President Tufts addressed the Senate as follows:

Fellow Senators:

Words almost fail me. I appreciate this honor very greatly; indeed, I may say without exaggeration, from the bottom of my heart. I regard it not as any empty honor, though the work of the session is over. I regard it rather as the crowning honor of my two terms in the New Hampshire Senate.

One of my friends once said that as he grew older he

realized more and more that a talent for friendship was worth more than anything else in this life. I hope we all have that talent for friendship. I think it has been exemplified here in this session on the part of us all. And without further words, for as I say, they almost fail me, I say to you that I thank you from the bottom of my heart. My cup runneth over.

RESOLUTION.

On motion of Senator Whittemore the following resolution was adopted:

WHEREAS, Senator Moses of New Hampshire has introduced in the Senate of the United States a bill appropriating \$3,500,000 for the purpose of erecting a memorial in France to the American soldiers and sailors who participated in the World War, therefore be it

Resolved, by the Senate of the state of New Hampshire that we indorse the proposed memorial of Senator Moses commemorating the heroic valor and great sacrifices of our soldiers and sailors and that we urge the enactment of the proposed measure of Senator Moses at the earliest practical moment, and urge our senators and representatives to use their influence to that end.

HOUSE MESSAGE.

Mr. President:

The House of Representatives has adopted the following resolution:

Resolved, By the House of Representatives, the Senate concurring, that a committee of ten to include the veterans of the Civil War who are members of the House, and such other members as the Speaker may designate, be appointed by the House to join with such committee as the Senate may designate to wait upon His Excellency, the Governor, and inform him that the legislature has completed the business of the session and is ready to receive any communication he may be pleased to make.

The Speaker appointed as members of such committee on the part of the House:

Messrs. Hunt of Nashua, Schenck of Tamworth, Leavitt of Portsmouth, Allen of Haverhill, Kimball of Stratford, Bartlett of Manchester, Pillsbury of Londonderry, Hamlin of Gorham, Murdock of Hill, O'Neil of Nashua.

On motion of Senator Moran the Senate concurred.

The President has appointed as members of such committee on the part of the Senate, Senators Garland, Parker, Gage, Rollins, Smalley, Orr, Conway and Frisbee.

COMMITTEE REPORT.

Senator Garland, for the joint select committee, appointed to wait upon His Excellency, the Governor, and inform him that the legislature had completed the business of the session and was ready to receive any communication that he might be pleased to make, reported that they had attended to their duty and had been informed by His Excellency that he

would, in person, make a communication to the legislature herewith.

His Excellency, Honorable Albert O. Brown, attended by the Honorable Council, then appeared and made the following communication to the Senate:

To the Honorable Senate:

No recent legislature has passed so few laws as this of 1921. None has rejected so large a percentage of all the measures introduced. Out of 527 bills and resolutions, 283 have become laws; and 244 have failed to pass. It is the quality, not the quantity, of your work, that will commend it to your constituents.

Among the acts of the session of major importance are the enactments providing for continuing boards of selectmen; for the maintenance of highways by the traffic they bear and for their protection against destructive use; for the improvement of the school law and some reduction in the cost of its operation; for the closing of certain jails; for the equalization of salaries paid by the state; and for the payment of fees and other income into the state treasury.

Extensive provision has been made for continuing the fight against tuberculosis in men and animals. The Sunday law has been retained, unimpaired, upon the statute book. The state's greatest highway has been named for her most distinguished son. The aid of the state has been extended to the city of Manchester to supply a need where local government, for the time being, had failed. Various commissions have been created to serve without pay in the interest of the state.

The appropriations provide for necessities, only, and not for luxuries. They are reflected in a deficiency tax of \$450,000 for the current fiscal year; a state tax of \$1,700,000 for the next year; and of \$1,500,000 for the year following that.

This result should mark a turning point in taxation. Your work in bringing it about is extremely gratifying to me, and in return I promise you the money appropriated

shall be expended with the utmost care and prudence, and that, so far as it can be prevented, no deficiency will be permitted to accrue.

I desire to thank you in behalf of the people of New Hampshire, whose servants you are and to whom you are about to return, for the general excellence of your record in legislation, and for the earnest and orderly manner in which, under a capable and efficient presiding officer, you have proceeded with your work. I also thank you for your splendid co-operation with me and for your kindness and courtesy to all with whom the public business has brought you into contact.

Having been informed by the joint committee of the Senate and House of Representatives that you have completed the business of the session and are ready to adjourn, I do, by the authority vested in me as Governor, hereby declare the General Court of New Hampshire adjourned to the last Wednesday in December of the year of our Lord one thousand nine hundred and twenty-two.

ALBERT O. BROWN,
Governor.

And thereupon the President, in accordance with the proclamation of His Excellency, the Governor, and by virtue of the authority vested in him, declared the Senate adjourned to the last Wednesday in December in the year of our Lord, one thousand nine hundred and twenty-two.

Clerk.

His Excellency the Governor had a communication which he desired to make.

The Governor, attended by the Honorable Council, appeared and delivered the following address:

Members of the General Court of 1921:

The administration which is now ending has dealt with that period of New Hampshire's history immediately following the victorious conclusion of the most devastating and deadly world war. The next biennial period which is entrusted to my worthy successor and to you, will also have its very serious problems. In passing to others the insignia of office and public trust, it becomes our duty to give at least a brief report of our stewardship, and to endow you with such recital concerning our experience as may be helpful in continuing without impairment the progress of the ship of state.

In accordance with the law, the departments have already prepared reports in detail of their service within the jurisdictional limits defined by statute. These reports must all be studied by one who seeks to know the condition of the state, I express no opinion of the departmental requests for appropriations.

The retiring administration began the enactment of certain laws and the making of certain appropriations which may be found in the pamphlet entitled "Laws of 1919." Your work begins where this volume ends.

Two pieces of legislation enacted during the past two years will undoubtedly stand forever towering at mountain height above all others. I refer to "suffrage" and to "prohibition." These are history. With a strong public sentiment behind them, and because they are so manifestly right in principle, there can be little doubt that they will be allowed to remain as completed and settled issues.

Next in importance as marking a real epoch in our state was the adoption of the principles of "Americanization," "Equalization," and "Supervision" with relation to our school system. At a time when reconstruction measures of

the surest objective were desperately sought as necessities of continued national existence, this legislation was particularly fortunate, and has made New Hampshire somewhat of a pioneer in the new era of schools following the war.

Of the soundness of the principles there can be no question. Of the wisdom of making the state the educational unit, and directing center of all public schools it would seem there could be no doubt. Of the advisability of having a state school board of practical business men to act as an administrative and judicial bulwark, there can scarcely be any difference of opinion. An organization of highly trained professional, and more or less technical educators requires the solid backing of courage and common sense which should always exist in a state board, and which I believe does exist in our board which consists of Messrs. Streeter, Hutchins, Fry, Lessard and Paine. I desire here to express my deep appreciation of their splendid service.

With reference to finances, particularly, the new school law is not well understood because of the fact that it consolidates lines of work formerly done separately, and in other matters acts as a kind of clearing house. It might seem to the casual observer to have added more to the expenses of the state than it really has.

The law compels universal supervision. Prior to it, there was no supervision in a large number of places and those were the ones that most needed it. This additional supervision costs someone about \$70,000. The law provides for paying for all supervision in the state by a \$2-per-child tax. This method distributes the expense so that the more favored centers, to some extent, aid in bearing the burden of less favored communities. Experience has proven that \$2 is not enough for this purpose unless the salaries of the superintendents are to be reduced. The state board decided that men having such important work to do should be men who are worth \$2,000,—should be men of that size. The law permits the districts or unions to increase this sum by bearing one-half the increase themselves. The fact that every union in the state has itself increased this minimum

salary, entirely relieves the state board of any criticism that they are too high.

You have a right if you desire, to amend the law making, the districts pay all the increase, or you may reduce the minimum if you desire. But in doing so you are sending cheaper men into these important fields to feed the minds of future Americans. There are sixty-four supervisory unions. The salaries amounted last year to \$186,596, which was about \$40,000 in excess of the receipts from the \$2 tax. The state board collects the tax and pays the superintendents who were formerly paid from the city or town treasuries.

The "equalization" feature of the law is as large as you care to make it. Many poor towns cannot have decent schools unless the state aids them. Last year \$283,000 was used for this purpose. This amount does very good work. I note that the board this year suggests \$400,000. This would do excellent work. It is your problem.

The actual additional expense for administering the department is only about \$15,000 more than the old system of administration.

The state board carried on without interruption the work of the former Department of Public Instruction, including the direction of the two normal schools, the administration of the child labor and mother's aid laws, and the inspection and approval of high schools.

The state aid has made possible a thirty-six-week year for all children, giving 6500 rural school children at least four weeks more of schooling than the districts have ever been able to give them before.

The board has caused 526 of the 1117 school buildings in use to be improved or remodeled along better lines.

It has formulated and put into operation plans for the systematic improvement of the health of school children. It has brought to clinics 117 children. It has extended health supervision until it has reached 98 per cent of our public school children.

It has been able to so combine the districts of the state

into supervisory unions that economical supervision is for the first time possible. It has employed well trained and experienced superintendents for all unions.

For the first time it has certified or licensed all teachers in our schools. It has improved the quality of instruction by accepting as teachers only those who meet fixed standards of education and training. The morale of the profession has been improved.

It has brought Americanization ideals to thousands of foreign-born and has increased the attendance at evening schools from 1500 to 6000.

It has secured co-operative working relations with the parochial schools of the Roman Catholic church and with other private schools, and has sympathetically inspected and reported on all such schools. I officially commend this patriotic co-operation.

It has accomplished these results in a period of advancing costs at a total increase in expense to state and district of about 21 per cent.

The worst abuse of advancing costs is in connection with the law compelling the transportation of school children. The total cost of all transportation of pupils in the state in 1916 was \$90,000, but by 1920 it had increased to \$195,000. There must be some wrong here somewhere. For your information only, I quote a few other figures. The total cost of all schools in the state in 1916 was \$2,285,000 in 1918 it was \$3,248,000, and in 1920 it was \$3,960,000, or a gain in two years of about 21 percent as compared with the gain of about 42 percent for the preceding two years. The total cost of all teachers in the state was \$1,269,000 in 1916, and \$2,071,000 in 1920. Janitors' salaries increased from \$100,000 to \$175,000, text books from \$55,000 to \$81,000, fuel, light and incidentals from \$128,000 to \$248,000.

The cost of all schools in the state in 1920 averaged approximately \$7 on a thousand on all taxable property in the state. But there were almost shocking differences however, in the different towns and cities. Some raised

only \$3.50, while others raised as high as \$12 on a thousand. These conditions which are being revealed under the careful study of the board opens up new problems. I think our present system is best calculated to solve them. The fact that the total school expense in the entire state increased only 21 per cent under the new board in the past two years as against at least 50 per cent increase in the cost of living and as against 42 per cent increase in schools themselves during the two years preceding the advent of the school board not only vindicates but extols the system.

There are outstanding instances of criticisable things in school matters but they are the discoveries of the law and not the off-spring of it. For instance, the city of Concord received school aid under the law in a class with needy towns. No city or town of over 3,000 people should be eligible to state aid or to be reimbursed for high school tuition.

No one who opposes the policy of putting money into the neediest towns in order that small children there may have a decent educational start in life can ever be heard to advocate appropriating even one cent toward giving the older boys and girls a college education at Durham or elsewhere. If we cannot afford to care for our small and helpless little ones, we certainly cannot afford to aid the strong "grown-ups" who can hunt for themselves for a college education, as many of us were obliged to do. The quality of our citizenship is developed in the district and elementary schools. The elementary schools are for all, the colleges for only a few. The young should have the first lien on our money.

The elementary schools of the country are being ruined by the far too numerous and extended requirements fixed by the college authorities. The high schools have a curriculum forced upon them by the college requirements that precludes the possibility of thoroughness. This high school situation compels the grammar schools to cover too much, to make the work superficial, to put languages in at the expense of the rudiments, and to spoil the training of the

many who can remain in school only a few years. The pace is too swift and the road too long for thoroughness. It is set by the college idealists for the benefit of the brilliant 10 percent, while the remaining 90 percent who are to become the backbone of our civilization fall by the wayside of learning, and go into life ignorant of those absolutely indispensable elements of education, and lamentably handicapped in the struggle for a livelihood.

The voice of the American people must cry out against such leadership by the college pace-setters. The average and ordinary boy and girl must have a chance to learn a few necessary things with abiding thoroughness. They cannot do this, and they do not do this, under the existing educational standards of this country today. The poor boys and girls who constitute the mass do not have a fair show in such a swift pace. They can go to school only a little while. It is bad for our civilization. We are as speed-mad in our educational system as we are in automobiling. I speak of it here only to aid in arousing public sentiment to fight what is next to crime against the young of our land.

This may well lead me to report on the State College. Its future policies must be left to other advisors. We have recognized its value, its important place and have appropriated more generously than usual for it. We have been, or have tried to be, as just friends to the institution as a survey of the interests of all departments in the state permitted us to be. It must continue to serve the cause of higher education in fields intended for it. But it is perfectly clear that we have in this college a vital question which must be dealt with carefully and firmly.

The state is not in sufficiently close business relation to this institution. We are educating young men there, and also young women, at an average loss, or cost, to the state of from \$300 to \$500 per scholar per year, and all of the increase falls upon the state treasury, since its permanent income is fixed. General expense conditions here will improve as prices go down. But the growth of the college

in numbers has been phenomenal, possibly alarming, considering the cost of each one to the state. There is scarcely no limit as to how large it may grow or as to how much it will cost.

I believe the state by a very definite law, after figuring out what it can annually afford to do for this institution, should most carefully prescribe by law the limits within which the college must keep in every line of its activity involving the public moneys. The state should, by some system of supervision make certain that those limits be not passed. I will go no further into the details of this question since my purpose is merely to emphasize that no department of the state should be permitted to establish, by its own action alone, any policies, practices, or salaries, which create debts for the legislature to meet.

This institution, as I understand it, has the power to borrow money, receive a limitless number of students, enlarge the college curriculum, erect new buildings, fix salaries, in other ways add to the permanent charge upon the state, and all without legislative authority. The state should be consulted first, before any step is taken which adds to the expense of the state. I express this view with positiveness, and with the reassurance that I am a friend of the college, and have the highest respect and admiration for the capable, honest, efficient and most excellent President of the college who is, in my opinion, one of the hardest worked men in the employ of the state, and also with full confidence in the excellent board of trustees.

I would expect that the president himself would prefer to have such a definite and fixed plan prescribed, and to know precisely the very definite policy of the state, and his financial limits, rather than be left in the maze of uncertainties and worries which surround his problem at the present time. There is, presumably, some limit on the amount of money which the state can afford to raise by taxation for this institution, consequently some limit upon the size to which it may be allowed to enlarge at the expense of the state. If this be so, let those limits be fixed. If it be not

so, let us be prepared (without censure) to raise any sums asked for to meet the debts created, or work to be performed. I can testify to the excellence of this college and I appeal very earnestly to all charitably inclined persons, and to benevolent will-makers to create memorial endowments to assist struggling students at this institution.

The Department of Agriculture is of very substantial value to the state. It is effectively and progressively managed, and I believe its funds are very economically administered. But it is for you to decide how much money shall be devoted to its various activities.

In cooperation with the federal bureau of Animal industry there developed an unlooked-for and serious situation with reference to bovine tuberculosis. Our appropriated funds were entirely insufficient to compensate for the necessary destruction of animals, and the governor and council, under emergency powers, transferred considerable sums to meet the crisis.

There exists sufficient evidence of at least a small percentage of transmissibility of this terrible disease to humans, and particularly to babies, enough to forbid ignoring it, although there are experts who are skeptical about the theory of transmissibility. All concede the commercial value of a good reputation for New Hampshire animal products in the general market, as to being free from this disease. We have no reason, however, to be panicky about it. Conditions here are much better than in most states.

The Bureau of Markets is proving of substantial help to the farmers and to the local purchasers as well. It is increasing in efficiency and practicability. The certainty of a market for the small producers is a great stimulus to additional endeavor.

A state like ours can afford as a business proposition to spend small amounts in judicious advertising. Our exhibition at Springfield in the autumn of 1919 was pronounced the best of the ten states there represented. Practically every kind of a New Hampshire enterprise was there dis-

played and exhibited to hundreds of thousands of people. We deemed the money well spent.

The Department of Agriculture attends to insect suppression, the regulation of the sale of commercial feeding stuffs, commercial fertilizer, fungicides and insecticides, testing agricultural seed, inspection of nurseries and nursery stock, registry of stallions, licensing of dealers in dairy products, inspection of fruit under the apple-grading law, and it holds profitable farmers' institutes. Its work should go on.

Vital beyond our usual conception is the highway problem. In general it may be said that the roads of the state viewed as an entire system, averaging up the good and the bad, have been a little better than in previous years, meaning by this that we are actually making some steady progress. The department has never been one half so well equipped as at present, having adopted a policy of owning instead of hiring. It now owns equipment property of a total value of nearly \$500,000. It has purchased the three story brick structure known as the Eagle stables in Concord to house its machinery and tools and repair them. It has secured gratis about seventy-five high grade auto trucks from the federal government. It now shovels by steam instead of by hand where possible. It has begun to buy gravel banks in all parts instead of buying gravel by the load as formerly to a large extent. It has established repair gangs in different sections of the state, supplied them with facilities for doing good repair jobs more quickly, and has adopted the idea of repairing more and faster and building less, of keeping up what we have rather than allowing them to become too far worn out while we are trying to build too much new. When prices reached sky heights about six months ago we practically abandoned new construction, and, therefore, we now have about \$300,000 ready to do projects when deemed wise to begin. One informed must admit that this department is in splendid condition. From my experience comes the conclusion that, with our present equipment and business methods, we can keep on improving our highway system each year by raising about the same amount of money as we

did two years ago, bearing in mind that the auto money is increasing and that it should be made to increase more rapidly by larger fees on heavy trucks.

The federal money comes to us with so many strings attached that we do not get nearly the practical advantage from it that we ought to receive.

We should be permitted to spend the federal aid money in a way suited to the needs of our own state. We ought to be trusted to that extent.

The tremendous destruction of our state roads when soft in the spring is the greatest waste that exists in the state. It is enormous when reduced to dollars and cents. For the first time we have attempted to invoke common law and prohibit the use of the roads by heavy trucks entirely during the soft season, and this, with some good results, but a statute law may be devised by you which will be more effectual.

Probably no state in the union has its roads worn out more than ours are by those autos which pay no license fee whatever. As a tourist state bidding for transient visitors this condition cannot be avoided unless we reduce the length of time in which they may remain free, or charge a fee to all. A financial compensation in part comes in the money left within the state by the summer tourists.

Patrolmen with horse power are unprofitable. They get over the road so slowly and do so little that the cost is not compensated for in results. Scientifically equipped and manned patching gangs with a few auto patrolmen, and better district supervision, would give better results for the same amount of money.

If the state lays out a road and then waits three years before it improves it a condition arises which is scandalous. The town waits for the state and the state waits for the money, while the public endanger their lives. This must be remedied. We have done a little to remedy such situations, but legislation is needed to cure it. It is far better to have passable roads everywhere than to have stretches of princely roads abruptly terminate in impassably bad ones, and besides, that creates a grave danger to life and limb. Ten

notoriously bad places in the roads of a state will give us more unfavorable advertising than can be overcome by hundreds of miles of magnificent boulevards. Our aim should be to keep all the roads at least decent, and then to add to our fine roads as fast as we may, while keeping up such a policy.

The recognition which we gave our world war defenders was \$100, a medal, and a state certificate. This was creditable as compared with the action of other states. The law provided also for a memorial to the dead of the entire state to be placed in or about the State House. A complete honor-roll believed to be accurate has been made through the commendable efforts of our state historian, Professor Husband, and plans for the memorial, though underway, have been impossible of completion.

You will permit me on behalf of all our people to express very feeling gratitude to our service men and women, not only for their wonderful service, but for their stabilizing and loyal influence during the turbulent reconstruction days. And the splendid spirit with which they are uniting with the veterans of the Civil War and aiding them in their years of enfeebleness is worthy of special commendation. Regardless of all other consideration and understandings and without the least personal allusion or feeling, I deem it my duty to record the belief that for the highest good of the state its military establishment should be placed in the hands of those splendid heroes who risked their lives in the world war to preserve our civilization.

My experience as governor does not permit me to criticize in the least the prosecuting and police authorities of, or within, the state. My belief is, however, that the automobile has opened up the possibility of criminality in the rural communities of the state to an extent which has not been met with adequate police protection. Then again, the dangers from rioting, such as we experienced at Raymond, suggests that the state should be able to furnish police assistance without calling on the military establishment. We have state police now, but their jurisdiction is limited to the

work of particular departments. There is an opportunity, without additional expense to the state, to so organize and co-ordinate our prosecuting and police agencies, and the similar agencies of the counties, cities and towns, as to better meet the new conditions. The rural communities of the state, during the automobile season, require active motor police service both day and night, not only against speeding, but against all kinds of criminality.

Permit me to discuss things somewhat elementary in relation to our state finances, and this for the purpose of establishing a right view point.

The amount of the state tax for 1919 was \$2,200,000.

For 1920 it was \$1,700,000.

Prior to these years the state tax had been \$800,000.

The reason for the increase was: to take care of obligations of over \$350,000 necessarily left over from the preceding administration suddenly confronted with war conditions; to meet the probability of the same war scale of prices being kept up, which probability was more than realized, since the war prices not only kept up but continued to increase; and then \$600,000 to pay the war bonus in part.

The legislature of 1919 voted no new buildings except a small farm house at Glencliff. It denied all requests for normal schools and armories, and dealt only in absolute necessities.

It enacted the so-called new school law which added around \$300,000 to the state appropriation, and it dealt rather more liberally with the State College than had been done formerly, buying war buildings and paying old debts.

It released the war conditions on the balance of the military act funds of around \$300,000 and put that at the disposal of the governor and council to parcel out to the departments as they became pinched by soaring price emergencies.

We had on hand at the end of the last fiscal year, viz: Sept. 1, 1920, the sum of \$124,478.01.

There will be some deficit before the end of the next fiscal year, which no one can now definitely forecast.

Under the new executive budget law enacted by the last legislature, the various departments have put in their requests for the next two years, and, if our non-state-tax income remains the same, and all these requests are allowed by you the state tax will have to be about \$2,200,000, or the same as it was in 1919.

There is a hopeful side to this situation. It is not for me to recommend what you shall do with these requests, but no legislature has ever allowed all every one asked.

Again there is hope in the future of prices. The state can certainly care for its more than 2000 pent-up wards more cheaply than during the past four years.

The extension of the inheritance tax law by act of legislature of 1919 will begin to show big results during the next two years producing an *additional* income of probably \$200,000 per year.

The new corporation law will continue to increase our income, in my opinion.

It is scarcely possible that we will be confronted with such extraordinary emergencies as last year.

The automobile income will increase.

The insurance income will increase under its thorough and competent administration.

Firmly believing that we are headed in prices back toward normal, I believe you can, if you desire, to economize reasonably, bring the state tax back to somewhat below \$2,000,000 without curtailing the efficiency of the school law or unduly limiting the State College, or any other established function of the commonwealth. I say this without prejudice to any policy which the next administration may have, and only to give you the view-point of my experience.

Now, I beg you to permit me to correct the erroneous impression that the state tax is what causes the local taxes to be so high. It is not. The state tax is the merest fraction of the local tax.

The total taxable property in the state on our present basis is \$556,647,000. If we wish to raise \$1,700,000, as we did last year, we first credit the railroads, insurance

companies, and savings banks tax of \$1,040,000 leaving \$660,000 to be raised by some other tax. This would require about \$1.20 on a thousand. In other words, the tax rate in your town has increased about \$1.20 on account of the state tax last year. If your rate was \$31.20 it would have been \$30.00 without the state tax. Every million dollars we raise for the state on the total valuation requires \$1.80 if there are no credits. You will see by this that any taxation plan which only helps the state raise money will not give much relief to the local taxes in the towns and cities. Several towns and one city paid no state tax last year, but, on the contrary, received a check from the state.

I believe high taxes are fundamentally bad for any form or kind of government and exceedingly harmful to business. I favor some tax on "intangibles," but not a duplication of the government's income tax. Too easy money leads to profligacy.

The question of salaries and wages of such officials as are not fixed by law, but are left to the decision of the governor and council, has been extremely perplexing. Going through crises of rising wages and scarcity of labor, both male and female, we have dealt with individual cases in such ways as seemed for the time necessary to keep the work of the state going as unimpaired as possible. The time may have come now when the whole subject can be dealt with on some better and fairer basis, both to the state and to the employees involved.

This administration has not discovered a satisfactory solution of the transportation problem. We found a system of paying ten cents per mile for the use of privately owned autos by the state employees obliged to travel, but this was not universal as some of the departments owned cars. Urgent requests have been repeatedly made to us to increase this mileage allowance, but we have not done so, except in instances where it seemed that large cars were demanded by the service. How and when autos shall be used instead of railroad service has been and probably must be left to the

administration of each department. But the whole situation impresses me as rather loose. I will merely ask the question, "Should not the state own all its necessary automobiles, have a central garage, and require any state employee who has need of a car to go to this garage and procure one and have it charged up to his department, returning it and accounting for it as he would be required to do in a strict business system?" We had this somewhat in mind when we decided to buy the old Eagle stables.

The fish and game department, under executive direction and approval, has established at New Hampton one of the very best hatcheries in the entire country, in the opinion of government experts, and this from the income of the department. It should go a long way toward solving the fishing question in our state. With it we have a state park of 160 acres.

The Daniel Webster farm is another state park which, when made approachable, will add to our summer attractions.

The forestry department is doing good work. These departments which have to do with the material beauty and richness of our state must be looked upon as a part of a business proposition, not as luxuries.

The management of the state institutions by the several unpaid boards of trustees has been highly successful, so much so that I know of no one now who would change. The presence of councilors on these boards has been fully warranted. It has kept the executive in close touch. I wish to express my fullest appreciation to the various men and women who have given such valuable, loyal and patriotic service to the state.

The office of the purchasing agent under the new law has done its work well and efficiently.

Conditions at the Industrial School have been made more humane. Flogging has been abolished. But there is a great unsolved and fundamental problem there, in my opinion. More than half of these children should never have been put into a criminal institution with a life-long stigma

put upon them. They most need homes and kindness, things most of them have never had.

The State Hospital and the school at Laconia are both in excellent condition. The Sanatorium at Glencliff is doing splendid work, while the State prison is a model institution.

The work of the Board of Charities and Correction has been uniformly sympathetic, efficient and thorough.

The treasurer and auditors have been particularly careful and painstaking in their vigilance over the finances of the state. The legislature of 1919 was the last to have the valuable services of the late James E. French to guard the appropriations, and his final work was well done. This administration has gone beyond no limits set by law under his leadership.

The services of the secretary of state have been very exacting on account of the new corporation law, new duties, and the troubling details of elections, in addition to all former duties, and I think they deserve special mention.

My experience leads me to the conclusion that appropriations for any department, or for any cause should be made definite, and not made in addition to the varying income of that department. All incomes should go into the treasury as income.

Those of us whose sworn duty it is to administer or appropriate for all departments and causes, have a far different task than the head of any single department. Each of them naturally makes ambitious requests with a view only to his special activity and interest, while those who must view the whole, who must decide the relative importance of things, and who must "add," and see what the total should be, have an obligation to the state which demands far-seeing wisdom, unvarying fairness and courage. No executor or legislator can rightfully be the special friend or advocate of any one department. His duty is, at all times to have the whole machinery of the state in mind, and keep all in the right relation and proportion.

All of the departments have served the state well, and there has been a general desire for co-operation. I wish to

thank each one of my fellow servants in the employ of the state for his or her loyalty to the state, and an always ready and willing assistance. Particularly would I publicly appreciate the splendid services of my councilors, Messrs. Clow, Whittemore, Welpley, Goodnow and Brown.

The attempt which I have made to serve and benefit my native state has been in reverent good faith. How much I have succeeded is not for my utterance. I have thoroughly enjoyed the service, and shall forever prize its associations and friendships, and I pass along to my most respected and highly esteemed successor my sincerest wishes for God's blessing upon his labors.

There is an immediate and imperative call for us all in every small or large way to assist in tiding the poor and unemployed over this winter of hardship and privation to very many. This is not a state matter, it is merely the call to practical charity and fraternal patriotism, which I may be pardoned for uttering. If we stand helpfully and hopefully together during this winter I feel sure that better days of employment and business will open up to us in the spring-time and summer, and continue improving into an epoch of real prosperity.

MESSAGE FROM THE SENATE.

A message from the Honorable Senate by its Clerk announced that the Senate had voted to concur with the House of Representatives in the passage of the following resolution:

Resolved, That the Senate will be ready to meet the House of Representatives in joint convention as suggested by the House Message, at 11.30 o'clock, for the purpose of receiving His Excellency, the Governor, and any communication he may be pleased to make, and for the transaction of such other business as may properly come before such convention.

On motion of Mr. Ahern of Concord at 11.25 o'clock the House took a recess for 5 minutes.

(After recess)

IN CONVENTION.

REPORTS OF COMMITTEES.

The Honorable Senate then came in and, the two branches being in convention, Senator Tufts of District No. 23, for the committee appointed to wait upon the Honorable Albert O. Brown and inform him officially of his election as

governor of the State of New Hampshire, reported that it had attended to its duty; that the Governor-elect had accepted said office, and would meet the Senate and House of Representatives in convention at the earliest convenient time to take the oath of office and make such communication as he deemed proper.

The report was accepted.

Mr. Blue of Conway, for the committee appointed to notify George W. Barnes, Albert Hislop, George E. Trudel, George L. Sadler and Fred S. Roberts of their election as members of the Honorable Council, reported that it had attended to its duty, and that the gentlemen named accepted the office to which they had been elected.

The report was accepted.

RESOLUTION.

On motion of Senator Emerson of District No. 12,—

Resolved, That the Chair appoint a committee of three, consisting of one senator and two representatives, to escort the Governor and Governor-elect to the House of Representatives.

The chairman appointed as such committee, Senator Emerson of District No. 12 and Messrs. Lord of Manchester and Willey of Newmarket.

The Governor, Governor-elect and the Honorable Council then came in, and the Honorable Albert O. Brown, Governor then took and subscribed to the oath of office and the oath of allegiance before the President of the Senate and in the presence of both branches of the legislature, whereupon the Hon. Leslie P. Snow, President of the Senate, made proclamation as follows:

Albert O. Brown, having been duly elected Governor of New Hampshire, accepted the office and taken the oath prescribed by the constitution, I do therefore declare and proclaim His Excellency, Albert O. Brown, Governor of the State of New Hampshire, to hold the office during the period prescribed by the constitution and laws of the state, and I present Your Excellency with a copy of the constitu-

tion of the state as a guide in the discharge of your official duties.

His Excellency then read the following message:

Senators and Members of the House of Representatives:

A transfer of the administration of state affairs from the very capable hands in which it has rested for the last two years into those as yet untried has been made in your presence. The trust is accepted with appreciation, in the hope of rendering service to the state. It is assumed with misgiving, however, because of the high standard set by those who have preceded me in the gubernatorial succession. And it is undertaken with notice that unusual difficulties and responsibilities are impending which cannot with honor be either avoided or declined. Some of these matters will be of legislative interest. As to them and as to any of like nature that may arise, I bespeak your support and your confidence, for which I freely promise to give you mine.

It is well for us to remember that no private ownership attaches to the offices into which we have been inducted. Others have held them before us and others will hold them after us. Even during the brief period of our incumbency they are not for our benefit in any private sense. They are the property of the state and exist solely for its advantage and profit.

Public office has now a new significance. It rests upon the suffrages of an enlarged electorate. For the first time the women throughout the state have been able to join with the men in electing a legislature to enact laws and an executive to enforce them. The ballot, given to women with some measure of hesitation, if not reluctance, has been so intelligently used that few would take it back.

The session upon which you have entered should not be prolonged, however difficult some of its work may be found

to be. There will be little need of the multiplication of statutes. It would not be surprising if the measures of positive merit presented for your consideration, aside from those calling for appropriations for the support of government, did not greatly outnumber the fingers and thumbs of both hands. Indeed, it would be well if a portion of your time could be devoted to the reconsideration and repeal of some of the unnecessary and unused enactments that are now technically in force. A short session with few laws would be greatly to the credit of all who are engaged in and about the business of legislation. This can easily be achieved by team work in those offices the duties of which we have undertaken to perform.

The most important question for your consideration is that of finance. To supply funds for the bare needs of government during the next biennium is a task of no mean proportions.

The public revenue is largely derived from various charges made by the state, some of which are, and the remainder of which may with some license be called, taxes. The return is reasonably constant. For the rest of the revenue recourse is had to the direct state tax. There is no other adequate method of reaching the pockets of the people.

This tax was increased from \$750,000 in 1915 to \$1,700,000, including a special recognition tax of \$200,000, in 1920. The most of this advance was due to the war and the high prices of goods and services that accompanied it. But it was none the less burdensome on that account to the people by whom the tax was paid.

If all the money required by the estimates filed with the state treasurer under the budget act and by additions reasonably to be expected is appropriated by you, the state tax will be further increased by more than 50% and will exceed \$2,500,000. But this is not the only or the chief tax. The county and the local taxes are in the aggregate much greater than this. The three levies added together and assessed, as under our constitution they must be, mainly upon the tangi-

ble property of the state, become very burdensome. Last year they amounted in round numbers to \$13,000,000, while the total cost of government by and within the state practically all derived from taxation in the broad sense of that word, was over \$17,000,000. If there were added the more than \$25,000,000 which it is estimated New Hampshire contributed to the support of the federal government it would be seen how drastic a thing taxation is.

Eighty per cent of all property taxes are laid upon real estate. The farmers in the country and the small freeholders in the villages and the cities are paying all they can afford. To them the present tax is a great burden.

The tax rate in fifty towns and two cities is \$3 or more upon each \$100 of a full valuation of the property assessed. Everywhere it is high. Thoughtful men will for the most part agree that it cannot with safety be raised to any considerable extent. As a practical proposition the limit has been reached.

If it is suggested that we should resort to new sources of revenue, the answer is that the only such sources of importance in existence have been denied us by the people. They at the last election failed to ratify either the income tax amendment or the inheritance tax amendment submitted by the convention to revise the constitution. Their adoption would have opened the way for large returns without appreciable hardship.

As the people cannot contemplate any material increase in existing taxes and as they have expressly declined to permit new ones, the inference is plain that they regard present revenue as sufficient for present needs.

Under these circumstances the proposition that the state should not during this administration enter upon new undertakings or the extension of present ones, entailing additional expense, admits of no doubt. We are in a period of abnormal costs, due chiefly to the inflation, the extravagance and the waste of war. The return to peace prices is slow and tedious, but it is in process. The trend is downward. Business is contracting and wages are falling. As long as the indi-

vidual is compelled to consider these factors his representatives in government, state and national, will not be justified in ignoring them. Moreover, the principal expense of a public department or institution lies not in its establishment but in its maintenance from year to year. On this principle the devise of the homestead of the late Benjamin A. Kimball for a governor's residence, so generously made and so highly appreciated, can hardly be accepted.

It is time to curtail in everything that is not imperatively demanded for the public welfare. But the absolutely conclusive argument against all new enterprises and expansions is the denial of additional revenue by the defeat of the tax amendments at the hands of the people, compelling a reliance upon present assessments which, as has been shown, cannot be advanced.

New Hampshire has ever been and ever will be a progressive state. In fifteen years she has expended more than \$20,000,000 for the education of her youth, for the care of her unfortunates, for the promotion of the health of her people, for the making of public improvements and for the development of the common resources. This is no slight achievement in view of the meagreness of her population and the scantiness of her wealth. In this connection it may be said of her that there are in the union only six states with fewer people and only three with less wealth. While we can have the necessities of government, we cannot afford all the luxuries and accessories that some of the more wealthy states enjoy. Our true course would seem to be to consider how we may adjust our public expense to the capacity of our own people to bear the burden.

The departments and institutions are asking for appropriations far in excess of the revenue of the state including the present state tax. That tax is nearly six times as great as it was fifteen years ago. Are there any public demands sufficient to justify a further increase? Will any state activity permanently suffer if in the aggregate the appropriations for the next two years are kept within the bounds

of those of the last two? These are questions that address themselves to the legislative as well as to the executive department.

These estimates of the departments and institutions are largely based upon present costs. May we not take into account falling prices? The appropriations of the legislature of 1921 will be for a biennial period beginning eight months hence. If present indications are a criterion, the cost of individual living will be materially less in the two years beginning September 1, next, then for the two years ending on that date. Such being the case, the costs of present state activities without enlargement thereof should also be materially less.

While it is true that there is a natural growth of important state undertakings, is it a wise state policy for successive legislatures to appropriate money with no thought of the ultimate cost of indefinite growth? Does not the state fail in business when it undertakes an enterprise if it disregards the burden it may impose in the future and thus permits it to enlarge without check or limit? Is not this the time to have a definite policy in regard to all state activities?

Fifteen years ago the state began to improve its highways of travel in response to a demand of the people. There has been no more wise or popular expenditure of the public money. Yet we are now face to face with the fact that it will require \$900,000 for each of the next two years to renew and repair the highways we have already built, without making any provision for new construction. Before authorizing new work ought we not definitely to determine, so far as we can control the future, how much are we to do and how far are we to go for a longer time than a single period of two years? Obviously this would be to the advantage of the highway department as well as the state.

By the act of July 7, 1866, the legislature established the New Hampshire College of Agriculture and the Mechanic Arts "whose leading object shall be, without excluding other scientific and classical studies, and including military tactics,

to teach such branches of learning as are related to agriculture and the mechanic arts." From very small beginnings the college has by rapid growth, especially in the last decade, become a school of more than eight hundred boys and girls. It is a very useful institution. Its excellence has attracted many students from other states. Three fifths of its instruction relates directly to agriculture and the mechanic arts, two fifths to what may in a broad way be called the liberal arts. In view of the fact that the leading object for which the college was founded was to teach the former subjects, is it not essential that the greater emphasis be laid upon that? Otherwise will they not be obscured and finally displaced by the more popular and attractive courses in the liberal arts? There is room for fear. Already only 23 per cent of the students at Durham are in the agriculture courses. What do the people want in the premises?

Many have expressed a preference to have the affairs of the institution so directed by the state and by those more immediately in charge that it will gradually and without prejudice become, as fully as may be, a college of agriculture and the mechanic arts, and as such be well manned, well equipped and well supported by the state. Thus the original purpose of the college would be observed and its requirements would come within our means.

For the cost of maintenance and other purposes, after a commendable reduction of estimates, the college is asking you for \$770,000 for the next two years. In the present condition of agriculture, might it not be well if such sums as are granted were required to be expended, as largely as possible, for the benefit of the valuable extension and experimental work already undertaken and for the aid of those New Hampshire students availing themselves of the agricultural and mechanical courses, with that fact and that purpose expressly stated in the law making the appropriation?

The last legislature after full consideration created a state board of education and provided for state aid to the com-

mon schools. What has been accomplished by the board and what it proposes to do in the future will be laid before you in its annual report. This report will give in detail the cost of its various activities. Its estimates for the next two years will also be given. Tentatively they appear to be \$1,340,000.

The members of the board are men of unusual experience and ability. They have given liberally of their time and effort without other compensation than the satisfaction that comes from service. They have done excellent work. But the cost is disquieting. So much so that the present legislature should inquire as to what limitations, if any, can be placed upon the expenses of the department of education without seriously impairing its usefulness, and act accordingly.

These three illustrations have been selected from our fifty departments and institutions because they are the largest, ask for the largest sums of money and show the largest increases of budget estimates for the next two years over their appropriations for the present year. Having them in hand I have ventured a few observations in the hope of being helpful.

A continuous policy for public undertakings is needed. The legislature should think beyond its own life in the act of providing revenue for the state's activities. A state tax of \$1,700,000 is too heavy a burden upon the real estate of those who own farms and homes, and in fact upon all tangible property.

But large expenditures are still imperative. Education must suffer no harmful neglect. The care of the unfortunates at the several charitable, reformatory and penal institutions established and conducted by the state cannot now be declined. The burden of these activities was assumed long ago and must be cheerfully borne. The public health, labor, good roads, forestry and other objects of public interest not here enumerated have their just and valid claims to recognition. Each has a right that none would deny to a

place in the budget. Agriculture, our basic industry, must be promoted if the towns as well as the cities are to prosper. Without the rural communities whence would the industrial centers derive their brain and brawn or those articles of food not commonly brought from a distance? The well-being of the state is involved with that of the towns equally with that of the cities. All these activities and interests should receive the same moderate support they have heretofore enjoyed. This can be allowed out of present receipts. But anything further must be denied on the basis of existing revenue. The only considerable relief, so far as I can observe, lies in the resubmission and ratification of the tax amendments which failed at the recent election.

A resubmission of the tax amendments may yet be accomplished if it is thought worth while. The constitutional convention of 1918-1920 still exists and may easily and speedily be reassembled. There have been many requests that this course be adopted. At the December conference of the Association of New Hampshire Assessors at Manchester, taxing officials and others being present from every section of the state, it was unanimously voted to be the sense of the meeting that the convention be reconvened and the amendments relating to taxation, the veto power and the reduction of the house of representatives be again submitted to the people on town meeting day in March next. At the still more recent meeting of the state grange at Claremont similar action was taken also with unanimity.

There are those who think the amendments would be ratified, if submitted at a time when the minds of the people were not occupied with matters incident to a general election but were open for the consideration of the needs of the state. It is a chance worth taking. Therefore, I suggest that upon some early day, by such procedure as may be necessary, you appropriate a sufficient sum for the travel and the attendance for one day of the members of the convention. Thereupon I shall consider it my duty to notify them to come together at the earliest convenient date. A

session of one day should suffice, for it is assumed that resolutions which were adopted with entire unanimity in January, 1920, would without delay receive at least a major majority vote a year later.

Permit me further to suggest that, in case the convention is summoned, the two houses of the legislature, upon the expiration of the time limited for the introduction of bills and upon their reference to the appropriate committees, adjourn for a period during which it is possible the committees could continue work and perhaps prepare some reports. Meanwhile the proposed session of the constitutional convention could be held. This plan by suspending the legislature prior to the second Tuesday in March would justify its sitting for a somewhat longer time after that day if found necessary in order to give force and effect to such constitutional amendments as might by any chance be ratified by the people.

It is not at all for purposes of extravagant use that new taxes should be granted, but wholly for purposes of proper expenditures and the equalization of the burden of taxation. Not only should they, if allowed, supply sufficient revenue for all necessary increases in the cost of government, but they should also permit the reduction or repeal of the state tax or its equivalent. To accomplish all of this it is apparent that the strictest economy in appropriations and the utmost efficiency in expenditures will be required. If it will aid the situation in any degree it may be remarked that measures in which a departure from these requirements is detected will meet with executive disapproval.

The improvement of the highways was begun in 1905. The purpose was to accommodate the light traffic of that time. The plan then adopted and since adhered to had regard to the quantity rather than the quality of construction, and although we have built more than fifteen hundred miles of trunk line and state aid roads at a cost on the part of the state, including upkeep, of \$5,000,000, and improved them year by year, they are still light for the burden now

imposed and their maintenance is costly. Fifteen years ago the horse was in undisputed possession of the highways. Today he has been excluded therefrom or relegated to the gutter and the fence to make way for vehicles driven by a power often fifty times as great as any he can impart. And these vehicles have not only developed a high speed but a capacity that enables them successfully to compete with the railroads in the transportation of freight. The result has been and must continue to be disastrous to our light roads with their correspondingly light bridges and culverts.

It would seem to be a reasonable proposition that ultimately the highways like the railways should be paid for and supported by the traffic they bear, and it is believed the policy of the state may well be shaped with this end in view. It is, therefore, suggested that the price for permits to motor vehicles be raised to correspond with the recent advance in the tax rate, that registration fees, especially those of trucks, be increased, and that adequate license fees be exacted for vehicles temporarily in the state. In this connection it may be added that heavily loaded trucks from Boston and other business centers outside of New Hampshire are very destructive to the highways in our southern counties. Considering the damage they cause should not all trucks, foreign as well as domestic, if operated in this state, be limited as to size, weight and load?

This plan offers, to be sure, only a minor source of revenue, but it can yield more than at present without distress, and in the end much more. It should, I venture to suggest, at once be made to return enough for upkeep and in due time sufficient for new construction as well. In this way it is believed the problem of highway costs may be solved with comparative ease.

New Hampshire has achieved an unenviable notoriety for automobile accidents. In respect to one class, at least, it stands, so far as can be ascertained, at the head of the list among the states of the union. Manifestly there is fault

in the law or its enforcement. It is for you in your discretion to amend the one or provide for the other or both.

The salaries of the state officials and employees are not established on a scientific basis. Some are fixed by statute, some by the governor and council and some by the departments themselves. The result is great inequality of compensation for services rendered and responsibility assumed. Obviously all salaries should, in the interest of uniformity and economy, be determined by the same authority and preferably by the direct action of the legislature itself. The estimates of state departments show at least two instances where the heads of the departments are asking for an increase of salary. Such requests are made at every session of the legislature. The annual salaries of state officials range from \$2000 paid to the secretary of the board of charities and corrections to \$5000 paid to the commissioner of education. The state treasurer receives a salary of \$3500 and the chairman of the board of bank commissioners receives \$3000. I know of no more responsible positions in the service of the state than those occupied by the last two officials. If their pay is adequate, then there are other state officers who are paid too much. If their pay is inadequate then it should be raised. But instead of dealing with the question of salaries piecemeal and in response to individual requests session by session, thus creating widespread dissatisfaction, I believe the legislature may wisely reestablish for the next two years, but not for a longer period, the salaries of state officials according to the importance of the work done by them and the responsibility placed upon their departments, having well in mind the present downward trend in living costs and the prospect of its continuance.

The legislature may also properly classify the clerks of the departments and fix their compensation by classes, so that appointments and promotions shall be by definite steps with graded salaries. There should be a maximum and a minimum salary for clerical services and the importance of

the work and the responsibility of the position should be the determining factors in fixing the pay of the various classes. Under this plan appropriations could be made for the clerical help of each department with the class and salary of the clerk specified in the appropriation bill. Then there would be no occasion nor would it be allowable for the departments or for the governor and council to increase salaries as has heretofore been done.

This readjustment might well extend, if possible, to the officials and employees of the state in general.

It is essential to a complete budget system, as suggested in the treasurer's report, that all the receipts of the departments and institutions should be paid into the treasury and become revenue to the state and that their expenses should be met by appropriations in their behalf. This would necessitate the abandonment of the practice existing in some departments and institutions of expending the amount of their net income from business operations, fees and other sources, in addition to or as if a part of their appropriations; and this custom should be discontinued, as otherwise no limit is placed upon expenses but the limit of receipts. The full amount allowed for expenditures should definitely appear in each appropriation. Then, in case it were exceeded, the somewhat drastic remedy provided by statute could be applied.

I have already said that agriculture is our basic industry. But farming in New Hampshire is not profitable. The census tells a story of waning agriculture. This tendency must be checked and a movement back to the land inaugurated. Otherwise our industries will suffer because the cost of living for their employees will be high. There is but one successful method of promoting agriculture. It is to make farming pay. How can this be done?

Students of the problem find that the chief fault in the business of the farm is defective salesmanship, and that the cure resides in some system of cooperative marketing.

There are now in this country fourteen hundred cooperative selling agencies, and their success has been phenomenal. In this state a beginning has been made among the dairy farmers. It is my hope that this start in the field of milk production will lead to the extension of the principle to our general crops. In the words of Dr. Eaton "we must shorten the process between cause and effect."

In 1919 New Hampshire dealers in produce, according to a partial survey by the bureau of markets, expended for agricultural products purchased outside of the state, all of which could have been grown here, a total of \$17,750,000. This huge sum, the equivalent of \$550 for every New Hampshire farmer, should have been retained within our borders. Indeed, a much larger portion of the \$80,000,000 we expend each year for food stuffs can be saved for our own agricultural interests under a wisely organized and well managed system of selling and distribution. This project will not make serious demands, if any at all, upon our treasury. The support of the bureau of markets and perhaps the incidental encouragement of the organization of cooperative companies seem to be the only ways in which the law making bodies can aid in this work, at least until such time as taxation can be reduced.

Among the commodities not likely to recede in price so much as others are lumber and coal. New Hampshire, according to the forestry department, has 1,750,000 acres of idle land which for the most part once bore magnificent timber. To reforest these areas would add immensely to their value for taxation as well as private use. The state has already undertaken to promote this work. Upon inquiry you may find that it can be further aided at slight cost.

The increased price of coal is a great handicap to industrial New Hampshire. It could be largely offset, however, by the development of our unused water power of which there is a large amount according to the report of the commission on water conservation. At an opportune time the state may desire by wise enactments to aid in this development and

may be justified in so doing on account of the enormous public benefit that would ensue. It will be time to consider the matter, however, when it is presented.

The state owns or operates under some arrangement with the owners one hundred and eight motor trucks and nearly as many motor cars. The highway department has purchased a garage for its own accommodation. You would do well to consider the advisability of establishing a central station where state used vehicles should be kept, with supplies therefor, to be used by the state officials for the business of the state upon proper requisition, a record of the use being kept and the expense being charged to the appropriate department or institution. The alternative would seem to be the hiring of all cars needed in the service of the state. One thing is certain, public cars should not be used for private purposes.

Prohibition is the settled policy of the state and nation. The saloon has disappeared from our midst and the quarters it once occupied are filled with useful merchandise for the common benefit. The young men and boys are safe. It is our purpose to keep them so. To this end enforcement must be rigidly maintained. It is worse to have an unexecuted law than no law at all.

Six of our counties have their jails apart from their county farms, while four have them upon their farms. In the latter the unfortunate poor are compelled to associate with criminals. Thus poverty is classed with crime.

Reform is said to be one of the chief objects of incarceration. Manifestly it can best be promoted under good management, but good management involves employment. Idleness, always harmful, is especially so in penal institutions. Now, in nine of our ten jails there are no opportunities for systematic labor, nor can they be afforded as a business proposition. And our houses of correction, which provide such opportunities for a part of the year, have no adequate means of restraint.

If there were a jail with facilities for labor available for all the counties, it is not improbable that many of the younger offenders who are sent to prison for a year and a day because they can be kept busy there might be sent to the minor institution and thus saved from the stain of a prison sentence.

Is it not time to consolidate the jails or to establish a state house of correction where prisoners may be sentenced for short terms and labor, non-competitive if you please, required? One of the present jails might be utilized, as there are in them all but forty eight prisoners and in the houses of correction only forty two more, ninety in all. Probably little, if any, new construction would be needed. At all events, the cost of supporting the inmates would be largely reduced and a considerable sum saved to the counties annually. This is a subject I commend to your earnest consideration.

From 1893 to 1919, inclusive, there were enacted over twelve hundred amendments to the laws passed during that period and nearly seven hundred amendments to the revision of 1891 known as the Public Statutes. Of the first one hundred chapters of the laws of the last session, seventy-one contain specific amendments to pre-existing statutes. In view of these facts would it not be wise to provide a legislative assistant for the proper drafting of laws? He could be charged with the further duty of furnishing members and committees of the legislature upon request with such information as he might possess or be able to obtain as to the state of the law upon any given subject. He should be available to members elect for a short period before the opening of the session so that they could ascertain from him whether the subject matter of desired legislation was prohibited by the constitution or already covered by the law of the state. If no objection appeared and a statute on the subject was still desired, then the services of the assistant could be enlisted for the proper drafting of the measure. All measures passing both branches of the legislature should be examined by him before being engrossed.

Something like eight hundred measures have been introduced as an average at recent sessions of the legislature. Of these only about one third have been enacted. It is thought the assistance suggested with reasonable cooperation should reduce the number of bills introduced fully one half, substantially cut down enactments and materially shorten the sessions of the general court. The saving in these respects and especially in the printing, now very costly, of bills, journals, and session laws ought to be much more than enough to meet the cost of the service. At the same time there would result a correctness of statutory phraseology as yet unknown.

If desired, this service could doubtless be rendered by the attorney general's office at slight additional expense.

In New Hampshire as elsewhere throughout the country there is much criticism of the workings of the direct primary election law. It is said that its operation results in an unfortunate selection of candidates with respect to location; that it requires a preliminary campaign which in ordinary cases is more burdensome to candidates than the final contest; that it provides no adequate method of summoning into the political field those who decline to proceed for themselves; that it involves a large outlay of money by the state as well as by the cities and towns; that it necessitates a considerable expenditure on the part of the candidates and permits others to make unlimited contributions for them through committees organized in their behalf; that by such considerations the candidacy of good men is often prevented and the impression created that the possession of wealth is a requisite to the holding of public office. These are the indictments. If they are true the law is inconsistent with our form of government and repugnant to our ideals of patriotism and good citizenship and should, therefore, in the language applied by Mr. Asquith to the House of Lords, be either "mended or ended." In any event, the freedom, the secrecy and the purity of the ballot should be fully protected.

When, after the declaration of war with Germany in 1917, it became evident that the national guard would be called into federal service, the state guard was organized to take its place, in accordance with the provisions of the law enacted for that purpose. This emergency organization of brave and patriotic men has continued until the present. But in view of the fact that in time of peace no state can maintain troops other than as authorized by the national defense act and because of the likelihood that peace will be declared at an early date, the state guard must soon cease to exist. Moreover, at any time the governor, with the advice and consent of the council, may, upon the recruiting of the national guard, cause the state guard to be disbanded and its officers and men to be honorably discharged. It is, therefore, my purpose to proceed without delay to reorganize the national guard under the provisions of the defense act. It is thought that the military law of this state, with such amendments as you may deem advisable, if any, will afford all the authority necessary to such procedure.

In a "government of the people, by the people, for the people" it is essential not only that suffrage should be universal as a matter of right but that it should be universally exercised as a matter of practice. At each election, however, many of our citizens are prevented from voting by unavoidable absence from the state. It is suggested that you consider the feasibility of some enactment in the interest of absent voters. If precedents are desired they may readily be found in other jurisdictions.

An experience of ten years in cooperation with the selectmen of the towns in the difficult and somewhat technical task of assessing taxes has convinced me that their term of office is too short. Before one can acquire much proficiency he is obliged to stand for reelection, with the ever present prospect of defeat upon the showing the brief time he has served will enable him to make. The uncertainty of service beyond a single year is often responsible for a lack

of effort on the part of newly elected selectmen to master even the rudiments of their position. It is recommended that the term of office be extended to three years, one member to be elected each year after the manner of the members of the school board, to whom the selectmen are analogous. Thus we should at all times have the advantage of a continuous and experienced body of men in charge of town affairs. The system is said to work well wherever it is in vogue.

The departments are efficient and the institutions well managed. There is little occasion to name them one by one. Their excellent condition is a fine tribute not only to their personnel but to the last administration and to those that immediately preceded it. I do not for the moment recommend any change in their organization. It is hoped that with full cooperation and abundant effort on the part of all who are concerned in their management, their standing may be preserved.

This administration will not expect to achieve the impossible or all of the possible but it will endeavor day by day to do the day's work. Thus it will hope to execute, with reasonable satisfaction, the great trust with which it has been invested by the people of the state.

The authorities authorized to issue said permits may at any time and without previous notice revoke said permits if they have reason to believe that the provisions of this act are being violated, and shall revoke if proof of such violation, that would be acceptable in a court of law, is presented to them.

Sect. 9. The city government in any city or the selectmen in any town, may make rules and regulations for the conduct of said sports and games, not in conflict with any of the provisions of this act.

MINORITY REPORT.

To the Senate and House of Representatives of the State of New Hampshire.

The legislature of 1919 passed a resolution as follows:

“*Resolved*, by the House of Representatives the Senate concurring. That we recommend the appointment by the Governor of a committee of twelve members to be chosen from both church and state in New Hampshire, to consider changing the Sunday Laws of the state, they to report with recommendations to the legislature of 1921 for consideration.”

In due time the members of the committee were appointed by the Governor, organized with a chairman and secretary, and gave notice of public hearings upon proposed changes in the Sunday Laws. Two public hearings were held at the State House in Concord where all persons were heard who desired to express opinions upon the subject matter coming before the committee. The committee has had several executive sessions, the last being at the State House on Friday, December 31st, 1920, where the members of this

committee discussed earnestly, but with the best of feeling, the evidence presented and any proposals of changes that came before them.

The discussion of December 31st developed that there existed among the members a very marked line of division, some feeling that no evidence had been brought forward of sufficient importance to warrant any change in the Sunday laws, and others feeling equally strongly that a change to make Sunday observance laws more liberal was expedient. We use the word 'expedient' advisedly for the personal feeling among the members was nearly, if not quite, unanimous that it would not be well to make a more open Sunday. Some of the members felt that there was a pressing demand for some more liberal law, and therefore subordinated any personal feeling they had to the alleged necessity for new laws for Sunday observance to serve the public welfare. We propose to examine the reasons given for proposed changes and submit our reasons why these arguments have not convinced us of the necessity or advisability of any change. The burden of proof in this case is upon the proponents of the attempt to modify the present Sunday law in various ways. The Sunday laws of New Hampshire as now upon the statute books represent a long established and settled policy in the matter of the Sunday observance and this policy so long settled and established should not be departed from without very substantial reasons.

The following motion was made before the committee and voted upon after some discussion:

"Resolved, That this committee recommend to the Legislature that no action be taken by it to liberalize the present Sunday laws of the state."

The members of the committee who subscribe to this report voted for the above motion and it expresses their convictions that any change which will make Sunday a more open day is not demanded by any large number of people, would not make conditions in the state better, and would be detrimental to the best interests of this state.

Many arguments were advanced by those who appeared

before this committee for the proposed change or changes and the advocates of such changes could not themselves agree what modification would best remedy the alleged evil conditions existing and would best serve the interests of the public. We listened to these arguments but they did not convince us of the necessity or wisdom of a change. We propose to examine the most important of them.

(1) It was urged by men of ability that the present Sunday law violates the personal liberty of the individual; that they restrict him in the exercise of certain fundamental personal rights; that their evident purpose and design is to force the individual to attend a church and to restrict therein his freedom in the exercise of his religious prerogative, and that no legislature has the right to enact such laws. Why, it is asked, should not a person be allowed to do as he pleased on Sunday within certain limits as well as on Monday? If amateur baseball is allowed on Saturday, the last day of our week, why should it not be played on Sunday, the first day?

We think that those who hold to such ideas have not read carefully the history and purpose of these statutes of New Hampshire. They are of long standing, and a discussion of their history is given in *George v. George*, 47 N. H. Rep., page 27. Their legality has been interpreted in various court decisions of New Hampshire. Various questions relating to the Sunday law have been before the Supreme Court of this state but so far as appears no person had the courage to argue before that body, at least successfully, that the legislature had no power to enact them. It has always been regarded as a question of expediency for that body and these laws thus enacted have never been held to be any more derogatory to the personal liberty of the individual than many laws that we obey without question.

It does not seem to us that the present N. H. laws are of the character and design alleged by those who advocate the change. It is the policy of progressive states to set apart Sunday as a day peculiar in itself—as a day of quiet and a day when those who desire to worship, whether by church

attendance or quiet meditation at home, may be secured in that desire. Those laws do not summon our people to worship. This obligation is usually left to the conscience of the individual. They do enjoin certain acts upon that day which tend to disturb or annoy those who worship. This purpose is well described by Judge Fellows of our Supreme Court when he said in the case above cited at page 34:

"The change introduced by the Revised Statutes was designed to withdraw all legislative control over the acts and conduct of the individual citizen, so far as they did not interfere with the public observance of the Lord's day—wisely holding that in respect to acts of a private nature not calculated to disturb others in the exercise of the appropriate duties of the day, the individual conscience alone should decide. At the same time we perceive no intention to diminish the restraints upon those unnecessary wordly acts which interfere with the public observance of the Lord's day; and therefore such acts when done openly or publicly in the presence of others are prohibited, because they are calculated to turn the attention of those who are present from their appropriate religious duties to matters of mere worldly concern, and thus to disturb them in the sense in which the term is used in the statute. The policy of the act is still to encourage the due observance of the Sabbath, as a day of rest from worldly labors and traffic, and of devotion to religious duties; and although it is left to the conscience of each citizen to decide whether he shall himself in private perform any secular labor, he must take care to do no such labor in a manner to turn the attention of others from their appropriate duties and fix it upon worldly business or traffic. The purpose is to give every citizen an opportunity to discharge the religious duties incumbent upon him on that day, without being disturbed, or having his attention withdrawn, by the career of worldly traffic or labor; * * *

The intent and purpose of those acts is also discussed by Chief Justice Gilchrist in *Varney v. French*, 19 N. H. Reports, page 233, and page 236. He there says:

"This provision aims only at protecting the public in their devotions and religious reflections; others, the law says, shall not be disturbed. It leaves each individual to employ himself as he may choose, subject only to this limitation. It does not aim at guarding him from himself. It does not seek to interest him in religion, by forbidding him to interest himself in things not religious. It leaves him to his own conscience, and does not attempt to furnish any other guarantee for the religious and devotional employment of his time, than such as may be afforded by his own views of his religious obligations."

We have quoted at length from these opinions because they bring out so clearly the character of this legislation. It does not operate upon his conscience, it restricts him in his acts, for the purpose—and for that only—of protecting and guarding those who feel that Sunday is meant for some other purpose than the enjoyment of worldly pleasures and the performance of week-day tasks.

Any proposed legislation which we have seen would break down these restrictions, sweep away the barriers erected by those who have preceded us, and would be the first attempt to open up Sunday to sports, games, moving pictures and the like, which have no place in a quiet and rational Sunday observance. We are convinced that New Hampshire is not yet ready to take the step which has been taken by other states to take from Sunday its rightful place in the week, and to make it merely a day like all the others.

(2) Some evidence was introduced before us that the change is desired by the cities, and that if no change was made, great evils must result. We were told that in a certain city in the state there are many radicals, who in the enforced quiet of a Sabbath day, congregate in dark corners to plot the downfall of the state: that a permission to those people to play an amateur game of ball between two and six of a Sunday afternoon is a sure relief to all their alleged ills.

It seems to us that such an argument cannot be earnestly made. The centers of lawlessness in this country are not

in those states where there is still some sane form of Sunday observance, but in the great and congregated centers of population where Sunday is only one day like the other seven, where base-ball, amateur and professional, is allowed, where races of all kind take place, and where in short, the distinction between Sunday and the other days of the week, to which distinction New Hampshire still adheres, has been thoroughly broken down. The unrest among those radical inhabitants in a certain New Hampshire city, if any exists, is not due to the strict enforcement of Sunday laws, and it will not be cured by breaking down the long established custom of New Hampshire with respect to Sunday observance.

(3) We were told by able speakers that the mill worker or factory man insists upon games and sports on Sunday, because he has no other time to enjoy himself. He works in the mill and factory on other days, why not make Sunday a real day for him, where he can have some relief from the grinding duties of the week? Whatever might such an argument may have once had, it can have but little now. The hours of all employees have been radically shortened in recent years. No one works Saturday afternoon, many shops close at five every night in the week. Every city of the state has its Sunset League games, every city of the state has—or could have if it desired—its Saturday games. One-third of the week is given up to work, one-third of it to sleep and there surely should be time enough in the other one-third for such play and relaxation as is necessary for the human body and mind. A canvass of the situation showed that perhaps three or four cities might, under local option, accept the provisions for amateur games and sports. If this is so, the demand for a change is not widespread, and not a reason why there should be placed upon the statute books of this state, a law overturning a settled and established policy of Sunday observance.

(4) The advocates of change maintain that the present law is unenforceable in its present form, and that the proposed law or laws only enact into statutes what is now done

without the sanction of law, in this state. This assertion we deny. So far as the statement refers to certain work now done which was not done in prior days, and to sales made on Sunday of certain articles such as sodas, cigars, newspapers, gasoline, and like articles we must admit that there is no legal sanction for many such acts. But there is no widespread desecration of the day by Sunday sports, amateur or otherwise. We regret the more or less widespread practice of opening certain stores on Sunday, for the sale of newspapers and other articles above mentioned, without legal sanction, and if the movement were merely to cover such acts and to give a legislative interpretation to the Sunday work law, to meet present day conditions, we do not feel it would be objectionable. But such a movement has always been joined with proposals to open up the day for Sunday sports, and to our mind we had far better retain the present law, even with its admitted imperfections, than to make Sunday, by the proposed changes that came before us, a day which has lost its long established purpose and meaning. Better keep out present statute, than to drive in the entering wedge that will end in making Sunday what it has been in Europe—a day not different from other days except by its excess of pleasure.

The country has been passing through a critical stage. During the war, everything was subordinated to winning the war, and we came to look with only mild concern upon many things that before we would not tolerate. War shakes the moral fibre of any people, and we are today feeling the effects of this moral breakdown in ways too numerous to name. Such a condition follows every war. It came in the late sixties as a result of the Civil War. It came in 1819–1820 as a result of world disturbances that ended in 1815, and of our own war of 1812. The way to meet these days is not by loosening and relaxing the restraints that the passing of the years has shown advisable. These conditions demand some measure of restraint, of sternness if you will, and a determined stand on the part of us all to check those tendencies of the time which cause us some alarm. This is

no time to break down the gates but rather to hold them fast. The times are not normal, and one of the crying needs of the day is some time for sane, sober, and quiet thinking. No one has pointed out to us a single nation that can trace its decay to a strict adherence to the principles that have, in this state, governed Sunday observance, but it is easy to name those whose decadence, was marked, among other things, by a wider and wider departure from the true spirit and purpose of the day. We cannot consent to recommend what we feel would break down, beyond repair, those principles of wisdom and sanity that long years have determined to be those which should govern our observance of Sunday for the best interests of ourselves, of our community, and of our state.

Respectfully submitted,

RULES OF THE HOUSE.

OF THE DUTY OF THE SPEAKER.

1. The Speaker shall take the chair at precisely the hour to which the House shall have adjourned, and shall immediately call the members to order.

2. He shall preserve decorum and order, may speak on points of order in preference to other members, rising from his seat for that purpose, and shall decide questions of order, subject to an appeal to the House by any two members.

3. Questions shall be distinctly put in this form, to wit: "As many as are of opinion that (as the case may be) say aye;" and after the affirmative vote is expressed, "Those of a contrary opinion say No." If the Speaker doubts or a division is called for, the House shall divide. Those in the

affirmative of the question shall first rise from their seats and shall stand till they be counted and afterwards those in the negative shall rise and stand till they be counted. The Speaker shall then rise and state the decision of the House.

4. He shall rise to put a question, but may state it sitting.

5. All committees shall be appointed by the Speaker unless otherwise directed by the House.

6. The Speaker shall designate to which of the standing committees all memorials, petitions, accounts, or other matters shall be referred, unless otherwise ordered by the House.

7. The Speaker shall not be called upon to vote unless the House be equally divided, or unless his vote, if given to the minority, will make the division equal; and in case of such equal division the question shall be lost.

8. All acts, addresses, and joint resolutions shall be assigned by the Speaker; and all writs, warrants or subpoenas, issued by order of the House, shall be under his hand and seal attested by the clerk.

9. In case of any disturbance or disorderly conduct in the galleries, the Speaker or chairman of the committee of the whole House shall have the power to order the same to be cleared.

10. No person but the members and officers of the House, members of the council, and members of the Senate, the secretary of the state, treasurer, and clerks of the Senate shall be admitted within the door of the Representatives' chamber unless by invitation of the Speaker, or some member of the House with the consent of the Speaker, except in public hearings, parties, their counsel and witnesses, under the direction of the Speaker.

11. The Speaker shall have power to substitute any member to perform the duties of the chair, such substitution not to extend beyond one legislative day.

OF DECORUM AND DEBATE.

12. When any member is about to speak in debate, make a motion, or deliver any matter to the House, he shall

rise from his seat and respectfully address himself to the Speaker.

13. If any member transgress the rules of the House, the Speaker shall, or any member may, call him to order; in which case the member so called to order shall immediately sit down, and the question of order shall then be distinctly stated from the chair; and in all cases where a member shall be called to order for uttering disrespectful words, upon the request of any member the words objected to shall be reduced to writing by the member so calling to order; after which the member so called to order may explain, and the question shall be open to debate, as in other cases, and decided by the Speaker, whose decision shall be submitted to unless an appeal be made to the House, by a member, in which case the only question shall be, "Is the Speaker's decision correct?" which shall be decided without debate. If the decision be in favor of the member called to order, he may proceed; if otherwise, and the case may require it, he shall be liable to the censure of the House.

14. In all cases the member first rising shall speak first. When two members rise at the same time, the Speaker shall name the person to speak.

15. No member shall speak more than twice on the same question without leave of the House; nor more than once until every member choosing to speak shall have spoken.

16. While the Speaker is putting any question, or addressing the House, no one shall walk out of or across the House; nor in such case, or when a member is speaking, shall entertain private discourse; nor, while a member is speaking shall pass between him and the chair; nor shall any member leave his seat while the yeas and nays are calling.

17. No member shall vote on any question in the event of which he is directly interested; nor in any case where he was not present when the question was put; nor sit upon any committee when he is directly interested in the question under consideration. In case of such interest of a member of a committee, the fact shall be reported to the House, and another person substituted on that question in his place.

18. Every member who shall be in the House when a question is put shall give his vote, unless the House, for special reason, shall excuse him.

19. No motion shall be debated until the same shall be seconded and stated from the chair; and when a motion shall be made and seconded, it shall be reduced to writing, if desired by the Speaker or any member, and delivered at the table, and read by the Speaker, before the same shall be debated.

20. No petition shall be received by the House unless it be presented by a member thereof, nor until the substance of said petition be concisely minuted, and the name of the member, and the town he represents, recorded upon the back thereof; and it shall be the duty of the Speaker to state, in the first place, the substance of the petition as minuted on the back thereof.

21. After a motion is stated by the Speaker, it shall be in possession of the House, but may be withdrawn at any time before an amendment.

22. When any question is under debate, no motion shall be received, but first, to adjourn; second, to lay on the table; third, for the previous question; fourth, to postpone indefinitely; fifth, to postpone to a certain day; sixth, to commit; seventh, to amend; which several motions shall have precedence in the order in which they are arranged. Motions to adjourn, to lay on the table, for the previous question, and to take from the table, shall be decided without debate.

23. The Speaker shall put the previous question in the following form: "Shall the main question now be put?" and all debate upon the main question shall be suspended until the previous question has been decided. After the adoption of the previous question, the sense of the House shall forthwith be taken upon pending amendments, in their regular order, and then upon the main question. The motion for the previous question shall not be put unless demanded by three members.

24. All incidental questions of order arising after a motion

for the previous question and related to the subjects affected by the order of the previous question shall be decided without debate.

25. If the previous question is decided in the negative, it shall not be again in order until after adjournment, but the main question shall be left before the House and disposed of as though the previous question had not been put.

26. When a question is postponed indefinitely, the same shall not be acted upon during the session except by unanimous consent.

27. Any member may call for a division of the question when the sense will admit of it; and upon a motion to amend a refusal to strike out words shall neither preclude amendment to such words nor a motion to strike out and insert.

28. A motion for commitment, until it is decided, shall preclude all amendments to the main question, and all motions and reports may be committed at the pleasure of the House.

29. No new motion shall be admitted, under color of amendment, as a substitute for the motion under debate.

30. No vote shall be reconsidered, unless the motion for reconsideration be made by a member who voted with the majority, nor unless the notice of such motion be given on the same day on which the vote passed, or on the next day on which the House shall be in session, between the hours of 10 to 12 o'clock.

31. When the reading of a paper is called for and objected to by any member it shall be determined by a vote of the House.

32. Any member may excuse himself from serving on any committee at the time of his appointment, if he is then a member of two other committees which have not reported.

33. Each member shall seasonably and punctually attend to his duty in the House, and no one shall absent himself from the service of the House unless he have leave, or be sick and unable to attend.

34. The Speaker shall appoint a teller for each division of the House, whose duty it shall be to report to the

chair the state of the vote, whenever a division of the House is called for.

House to that effect, appoint an additional committee on the same subject, to consist of the same number of members as the original committee, whose duty it shall be to take into consideration all matters in relation to that subject which shall be referred to it by the House, and to report thereon.

OF BILLS.

40. All petitions, memorials and other papers addressed to the House and all bills and resolutions to be introduced in the House, shall be endorsed with the name of the person or committee presenting them, with the subject-matter of the same, and shall be placed by the members presenting them in a box provided for the purpose by the clerk. The Speaker shall take them up for introduction at the morning session.

41. Every bill and resolution originally introduced into the House shall be expressed in words clearly, so that it shall not be necessary to refer to any other act or statute to ascertain the meaning thereof.

42. Every bill shall have three several readings in the House previous to its passage. The first reading shall be for information; and thereupon if it be not rejected or otherwise disposed of by the House, the question shall be, "Shall the bill be read a second time?" and if ordered to a second reading it shall immediately be read a second time by its title, be laid upon the table to be printed under Rule 46, and be by the Speaker referred to the appropriate standing committee, unless otherwise ordered by the House. No bill after it has been read a second time shall have a third reading until after an adjournment. The time assigned for the third reading of bills and resolutions shall be three o'clock in the afternoon, unless otherwise ordered by the House.

43. No amendment shall be made but upon the second reading of a bill or joint resolution; and all bills and resolutions shall be in writing, with the name of the member and the town he represents on the back thereof. The orders of the day for the reading of bills and joint resolutions shall hold for every succeeding day until disposed of.

44. All bills, and all votes and resolutions that are necessary to be carried to the Senate for their concurrence, may be sent by the assistant clerk.

45. Every bill shall be marked on the first page "House bill," and every joint resolution shall be marked "House joint resolution," and each bill and resolution shall be regularly numbered, beginning with No. 1, and continuing consecutively, as each bill or joint resolution is introduced into the House.

46. Every bill and joint resolution introduced into the House, either by a member or by a committee, shall be declared by the Speaker laid upon the table, after it has been read a second time, and the clerk shall procure a sufficient number of copies, printed on paper of uniform size, for the use of the House, and cause the same to be distributed to the members, and when printed the bill shall be immediately delivered to the committee to which it shall have been referred. Bills and joint resolutions received from the Senate shall be printed at the same stage of their procedure unless they have been printed in the Senate and copies distributed in the House.

47. When a bill or joint resolution is reported favorably with an amendment, the report of the committee shall state the amendment and then recite the section of the bill or resolution in full as amended. The bill or resolution, if the change is material, shall then be laid upon the table to be printed and distributed as required by Rule 46 and when so printed and distributed the clerk shall, after one day, cause the same to be laid upon the Speaker's table, and it shall be taken up in order without motion and disposed of in the same manner as it would have been had it not been declared laid upon the table.

All bills or joint resolutions otherwise reported shall be laid upon the table and shall not be finally acted upon until the following legislative day, and a list of such bills or joint resolutions with the report thereon shall be published in the journal of proceedings for the day on which they were reported.

48. All bills and joint resolutions appropriating money, reported from any committee, shall be referred to the committee on appropriation for revision.

49. No standing rule or order of the House shall be rescinded without one day's notice being given of the motion therefor; nor suspended, unless by a vote therefor of two thirds of the members present.

OF THE COMMITTEE OF THE WHOLE HOUSE.

50. The House may resolve itself into committee of the whole House at any time, on the motion of a member made for that purpose; and in forming a committee of the whole House the Speaker shall leave the chair, and a chairman to preside in committee shall be appointed by the Speaker.

51. Upon bills and resolutions committed to a committee of the whole House, the bill or resolution shall first be read throughout by the clerk, and then again read and debated by clauses, leaving the preamble of the bill to be last considered; the body of the bill or resolution shall not be defaced or interlined, but all amendments, noting the page and line, shall be duly entered by the clerk on a separate paper, as the same shall be agreed to by the committee and so reported to the House. After report, the bill or resolution shall again be subject to be debated and amended by clauses before a question to pass it to a third reading be taken.

52. The rules of proceeding in the House shall be observed in committee of the whole House, so far as they may be applicable, except the rule limiting the time of speaking.

ORDER OF BUSINESS OF THE DAY.

53. The Speaker shall call for petitions from members of the House. The petitions having been presented and disposed of, reports first from the standing and then from the select committees shall be called for and disposed of. And the above business shall be done in no other part of the day, except by permission of the House.

54. The unfinished business in which the House was

MESSAGE FROM THE GOVERNOR.

His Excellency, the Governor, laid before the members of
the Senate and House of Representatives, the following
message:

Senators and Members of the House of Representatives:

There is transmitted herewith a letter from a committee
of the New Hampshire Bar Association by the pen of its
chairman, the Honorable Edgar Aldrich. It is suggested

therein, that the state pay a modest tribute to the memory of her most distinguished son by designating one of her trunk line roads, as the Daniel Webster Highway.

Mr. Webster was trained in our schools, achieved professional prominence in our courts, and represented the people of our first congressional district in the national House of Representatives. After removing to Massachusetts, at the age of thirty-four, and after his fame had filled the world, he continued to hold this state in affectionate regard, while to the end of life, the dearest spot on earth to him was the immediate and incomparable region of his birth.

His splendid public services, relating chiefly to the federal constitution, the national boundary lines, and the commerce on the ocean, benefited not one state, but all, and none more definitely than New Hampshire. In the light of all these facts, it may be said with truth that, in an especial degree, his reputation and his fame belong to us. It is, therefore, proper that we honor his memory by assigning his name to that great central avenue of travel over which there comes every year a multitude of people, representing all the states of the union and most of the nations of the world.

This matter is committed to your careful consideration.

ALBERT O. BROWN,
Governor.

United States Court, Littleton, N.H.
January 25, 1921.

*To His Excellency, Governor Brown,
Concord, New Hampshire.*

DEAR GOVERNOR:

The New Hampshire Bar Association, at its last annual meeting, passed a resolution in the following words:

"Resolved, by the Bar Association of New Hampshire, at its annual session at Newcastle by the Sea, June 26, 1920, that its President be authorized and requested to appoint a committee of fifteen to make it known to the Governor of the state that it is the sense of this association that, as a

tribute to a son of New Hampshire,—and to the most famous expounder of the Federal Constitution,—that one of the main boulevards from the Massachusetts line to the northern boundary of New Hampshire, or as far northerly as may be deemed most appropriate, be statutorily designated, and properly marked, as the “Daniel Webster Highway”; and that the question of doing it be submitted to the General Court at its next session.”

In pursuance of this resolution, Mr. Joseph Madden, the President of the Association, has created a committee in the words following:

Judge Edgar Aldrich of Littleton, Chairman,
Ex-Governor John H. Bartlett of Portsmouth,
Judge George H. Bingham of Manchester,
President Ernest Hopkins, of Hanover,
General Frank S. Streeter of Concord,
Honorable Merrill Shurtleff of Lancaster,
Honorable William J. Britton of Wolfboro,
Honorable Roy M. Pickard of Keene,
Honorable Hosea W. Parker of Claremont,
Honorable A. W. Sulloway of Franklin,
Honorable Dwight Hall of Dover,
Honorable Orton B. Brown of Berlin,
Honorable Oscar L. Young of Laconia,
Honorable Raymond B. Stevens of Landaff,
Honorable J. J. Doyle of Nashua.

I am requested and instructed by the committee to call your attention to the action of the Bar Association.

In communicating to you this action which contemplates that the question be submitted to the Legislature, the Committee begs leave to commend favorable consideration of the proposition to name one of the New Hampshire roads the “Daniel Webster Highway.”

The idea of doing this was very deep in the heart of the late Senator Chandler, to whom New Hampshire owes much. In a letter to the writer,—which was probably the last he ever wrote with his own hand,—Mr. Chandler en-

joined that this appropriate thing should not be lost sight of by New Hampshire.

We desire to urge that the plan be carried out.

Daniel Webster's renown, in a large sense, belongs to New Hampshire. The people of the country, naturally enough, associate him and his fame with Massachusetts, and he has come to be generally known as a Massachusetts man. Here is an opportunity to identify him with New Hampshire in a way which will operate on lines of popular education.

The authoritative designation—the markings—the automobile books and maps, will rightfully make it known to the vast number of people from the various parts of the country who motor through our valleys and among our hills—and to the world—that Daniel Webster was a New Hampshire man, and that will go to the honor of the state. Beyond this, it will be a great tribute to one who loved outdoor life,—the rivers,—the streams, and the lakes,—to one who believed in broad highways, and who looked forward to his journeys from his Massachusetts home at Marshfield by the Sea, to his birthplace in Salisbury, New Hampshire, and to one who always worshipped the New Hampshire mountains as he journeyed north.

In order that New Hampshire men and women of today may know of Daniel Webster's lofty and sublime appreciation of his New Hampshire birthplace, and of his devout and lasting attachment to his humble birthrights, your committee, perhaps, will be pardoned for quoting a passage from his famous speech at the great Saratoga mass meeting in 1840, in what was known as the Log Cabin Campaign of General Harrison, in which General Harrison's opponents sought to taunt and discredit him by reference to his humble log cabin birthplace. Here is Daniel Webster's characterization of the taunt:

"A man who is not ashamed of himself need not be ashamed of his early condition."

Gentlemen, it did not happen to me to be born in a log cabin; but my elder brothers and sisters were born in a log cabin, raised amid the snow-drifts of New Hampshire, at a

period so early that, when the smoke first rose from its rude chimney, and curled over the frozen hills, there was no similar evidence of a white man's habitation between it and the settlements on the rivers of Canada. It remains still exist. I make to it an annual visit. I carry my children to it, to teach them the hardships endured by the generations which have gone before them. I love to dwell on the tender recollections, the kindred ties, the early affections, and the touching narratives and incidents, which mingle with all I know of this primitive family abode. I weep to think that none of those who inhabited it are now among the living; and if ever I am ashamed of it, or if I ever fail in affectionate veneration for him who reared it, and defended it against savage violence and destruction, cherished all the domestic virtues beneath its roof, and, through the fire and blood of a seven years' revolutionary war, shrunk from no danger, no toil, no sacrifice, to serve his country and to raise his children to a condition better than his own, may my name and the name of my posterity be blotted forever from the memory of mankind.

We think it should be "Highway," not "Boulevard." The "broad highway" was a favorite expression of Webster.

It must be remembered that they have named the motor road from New Orleans to Winnipeg the "Thomas Jefferson Highway." This was a fine thing to do, because it is all the way from New Orleans to the boundary line within the Louisiana purchase which Jefferson negotiated,—a purchase which greatly inured to the nation's strength and renown. In Pennsylvania they have the "William Penn Highway"; across the continent, we have the "Lincoln Highway"; from Portland, Oregon, to Portland, Maine, there is the "Roosevelt Highway" which crosses northern New Hampshire.

Daniel Webster, more than any other man, laid the foundation for the Union argument, which made it possible to successfully carry forward the Civil War. He was not only the most famous orator and statesman of his generation, but among the most famous of all time. His closing words

in the United States Senate in reply to Senator Hayne of South Carolina, standing alone, would render his name immortal—"Liberty and Union, now and forever, one and inseparable!"

We think it highly appropriate that Daniel Webster's name should attach to the leading highway from the Massachusetts border to a point as near the northern boundary of New Hampshire, which was established by the Webster-Ashburton Treaty, as the state road goes. And we think it should be dignified by as straight a course as is geographically practicable. We should be very sorry to see any minor questions of locality operate against this idea.

To make it a just tribute to Webster, it should be under state authority, and the logic of the situation, would seem to require that it should start from the Massachusetts boundary and pass through Nashua, Manchester, Pembroke, Concord, and Boscawen,—a route over which he travelled for so many years,—and which would carry the designated road as near the birthplace as the highway goes; thence through Franklin, Tilton, Laconia, Meredith, Plymouth and near the little court house where it is said he made his first argument to a jury; thence northerly through Woodstock, through the Franconia Notch, and under the eye of the stately Old Man of the Mountain; thence to Carroll, Whitefield, Lancaster, Stratford, Colebrook, and as far north as the state road goes towards the boundary which Webster established.

It will be a long day before New Hampshire or the world will have another Daniel Webster.

It will be seen that this project does not carry the idea of any new highway, or of an appropriation. New Hampshire will honor herself and the name of her greatest son by authoritatively attaching his name to her broadest avenue of modern travel.

Respectfully submitted,
EDGAR ALDRICH,
Chairman of the Committee.

The message was referred to the Committee on Judiciary.

PRELIMINARY REPORT OF THE COMMITTEE ON EDUCATION ON THE EMERGENCY NEEDS OF THE BOARD OF EDUCATION.

To the Speaker of the House of Representatives:

The Committee on Education begs leave to present for the information of the House a statement as to the emergency needs of the school districts which rely for their support on state aid.

The following report has been made to the Committee by the State Board of Education.

Original

NEW HAMPSHIRE STATE BOARD OF EDUCATION

CONCORD, FEBRUARY 2, 1921.

To the Committee on Education

of the House of Representatives,

Mr. A. T. Dudley, Chairman.

We submitted to you yesterday the following facts showing the financial situation growing out of the calls of the school districts for state aid for the current year ending August 31, 1921, which were a little more than twice as much as the calls for the preceding year ending August 31, 1920.

1. *Year Ending August 31, 1920.*

Aggregate claims of districts for state aid	
made in their budgets of December,	
1919,	\$383,486.60

Amount allowed by State Board and distributed	\$283,031.09
---	--------------

Amount disallowed	\$100,455.51
-------------------	--------------

2. *Year Ending August 31, 1921.*

Aggregate claims of districts for state aid made in their budgets of December, 1920,	769,455.05
Amount allowed by State Board	526,003.42

Amount disallowed	\$243,451.63
-------------------	--------------

3. To meet the distribution of \$526,003.42 of state aid allowed to 194 school districts for the current year, the amount now available under existing appropriations is (about) \$280,000.

Additional appropriation of \$246,000 will be required to provide for the full payment of the legitimate claims, as allowed, of the districts for the maintenance of their schools during the current year as contemplated by the law.

4. The needs of very many of the state aided districts (194 out of a total of 256) are such that they will be greatly embarrassed and many schools will either be closed or the school year greatly shortened unless they can receive the State aid to which they are entitled and which has been approved.

5. In this situation the State Board believe it to be its duty to distribute to the state aided districts at an early date the moneys available for that purpose and has voted to distribute that amount *on a pro rata basis* to the school districts entitled to state aid for the current year and it is intended to make said distribution at an early date.

6. The largest item in this increased call for state aid the present year (\$769,000) over the calls for the preceding year (\$383,000) is in the increase of teachers' salaries beginning September 1, 1920, although considerable increases in other items of district expense appear to make up the aggre-

gate increase in the calls from \$383,000 to \$769,000 and in the amount allowed from \$283,000 to \$526,000.

The commissioner will furnish all details to the end that your committee may be fully and accurately informed of the exact situation and the reasons therefor.

7. Annexed hereto and made part hereof is a tabulation showing the following facts in relation to every state aided district:

1st Column—	State aid requested year 1919–20			
2nd	“	“	“ allowed	“ 1919–20
3rd	“	“	“ requested	“ 1920–21
4th	“	“	“ allowed	“ 1920–21
5th	“	—Pro rata distribution to be made to each district of the money now available.		
6th	“	—Pro rata balance due each district from funds when and if appropriated.		

We respectfully urge that your chairman and every member of your committee carefully examine in detail the facts above stated, and in addition thereto the various provisions of our Educational Act and the practical administration of the law by the State Board, the commissioner, the deputies and superintendents; consider what amendments are desirable for the better working of the act and make your report on all these questions to the end that not only the members of the legislature but every member of the local school boards and interested citizens may be fully informed about the law, how it is working and whether it ought to be amended or repealed.

STATE BOARD OF EDUCATION

By FRANK S. STREETER,
Chairman.

From the above report, it appears:

1. That the state aided districts are facing a situation of such seriousness as to require the fullest and most generous consideration at the hands of the legislature.
2. That the deficiency report is due in no sense to extrav-

agance, but to the unexpected increased market cost of every item of school expenditures.

3. That unless relief is granted by the legislature, every one of the 194 state aided districts will find itself in financial straits and one-third will be compelled to close their schools.

Your committee takes this opportunity to report to the House that as soon as the situation can be properly canvassed and the needed changes ascertained, it will offer to the House a bill for amendment of the school law of 1919. The committee will later present a joint resolution for emergency relief.

A. T. DUDLEY,

For the Committee on Education.

The report was accepted.

On motion of Mr. Dudley of Exeter, the clerk was instructed to procure 1,000 copies of the foregoing report, incorporating therewith the tabulation accompanying said report.

On motion of the same gentleman, the clerk was directed to omit the tabulation from the journal.

On motion of Mr. Challis of Manchester, the rules were suspended to allow of the first and second reading by their titles and printing of two bills introduced by the Committee on Revision of the Statutes at the morning session, previous to their being recommitted to the committee.

COMMITTEE REPORTS.

Mr. Rogers of Wakefield for the Committee on Judiciary to whom was referred House Bill No. 114, An act in amendment of Chapter 202 of the Laws of 1917 relating to the sale of securities, reported the same with the following amendment, and the recommendation that the bill as amended ought to pass.

Amend Section 1 by inserting after the word "dollars" in the fourteenth and forty-first lines the following words: "and furnishing evidence satisfactory to the insurance commissioner that the issue of such license will not be inconsistent with the public interest"; so that said section as amended shall read as follows:

SECT. 1. Section 1 of Chapter 202 of the Laws of 1917 is hereby amended by striking out of the same the words

“nor in the case of the foundation of a New Hampshire corporation organized to do business within the state shall the offer of a sale of its securities by such corporation constitute it a dealer in securities. The term ‘securities’ shall include all classes of stocks, bonds, debentures or certificates of participation,” and inserting in place thereof the following:

“Any corporation chartered by or organized under the laws of this state and actually engaged in business herein, or any public utility corporation actually engaged in business in this state, shall be entitled to receive from the Insurance Commissioner a license authorizing it by its officers, agents, and employees to sell its stocks, bonds or other securities within this state, upon making application therefor and paying a license fee of ten dollars and furnishing evidence satisfactory to the insurance commissioner that the issue of such license will not be inconsistent with the public interest. Every such local corporation shall from time to time file with the commissioner the names and residences of its agents and employees authorized to make such sales on its behalf and shall pay a filing fee of one dollar for each agent and employee so authorized. Such corporation so licensed and its officers, agents and employees shall not be regarded as dealers in securities under the provisions of this chapter. The term ‘securities’ shall include all classes of stocks and shares, bonds, debentures, evidences of indebtedness and certificates of participation.”

So that said section as amended shall read as follows:

SECTION 1. Under this act, the term dealer shall mean any individual, partnership, association or corporation engaging in the selling or offering for sale of securities, except to or through the medium of, or as agent or salesman of, a registered dealer. But sales made by or in behalf of a vendor in the ordinary course of *bona fide* personal investment of his personal holdings or change of such investments shall not constitute such vendor or the agent of such vendor, if not otherwise engaged either permanently or temporarily in selling securities, a dealer in securities. Nor shall the offer

of or sale of its own securities by an association or a corporation to its own members or stockholders constitute such association or corporation a dealer in securities. Any corporation chartered by or organized under the laws of this state and actually engaged in business herein, or any public utility corporation actually engaged in business in this state, shall be entitled to receive from the Insurance Commissioner a license authorizing it by its officers, agents, and employees to sell its stocks, bonds or other securities within this state, upon making application therefor and paying a license fee of ten dollars and furnishing evidence satisfactory to the insurance commissioner that the issue of such license will not be inconsistent with the public interest. Every such local corporation shall from time to time file with the commissioner the names and residences of its agents and employees authorized to make such sales on its behalf and shall pay a filing fee of one dollar for each agent and employee so authorized. Such corporation so licensed and its officers, agents and employees shall not be regarded as dealers in securities under the provisions of this chapter. Said bonds shall be payable to bearer, shall be dated April 1, 1921, shall be in the denomination of one thousand dollars (\$1,000) each, shall mature five thousand dollars (\$5,000) on the first day of December of each of the years 1922 to 1931 inclusive, shall bear on face interest at a rate not exceeding five (5) per cent. per annum payable December 1, 1921, and semi-annually thereafter, and shall bear the county seal.

Amend Section 4 by striking out after the word "notes" in the fourteenth line thereof the words "shall be reckoned outside the statutory debt limit"; so that said section as amended shall read as follows:

SECT. 4. The county commissioners may in the name of the county make a temporary loan for a period of not more than one year in anticipation of the money to be derived from the sale of such bonds and may issue notes therefor, the proceeds of said notes to be applied to the payment of said floating indebtedness specified in section one herein may renew or refund such notes from time to time by an issue of new notes maturing within said period fixed for said temporary borrowing, *provided* that the period from the date of issue of the original anticipatory note and the date of maturity of such renewal or refunding notes shall be not more than one year, and *provided*, also, that the period within which said bonds shall become due and payable shall not be extended, by reason of the making of such temporary loan, beyond the time fixed by section one of this act. Said notes may be in such form, may bear interest at such rate, or may be sold at such discount, as the county commissioners and the county treasurer may deem proper,—discount to be treated as interest paid in advance.

for board, lodging, support, maintenance, or personal care and attention, covering a period of more than six months, shall be subject to the same tax imposed by this chapter upon a legacy or succession of like amount, except to the extent that such claim is evidenced by a writing signed by the decedent containing an agreement for payment at some specified time or times within the decedent's lifetime. Payments of the amount so certified shall be a discharge of the tax. An executor, administrator, trustee or grantee who is aggrieved by any such determination of the state treasurer and who pays the tax assessed or demanded, without appeal may, within one year after the payment of such tax to the treasurer, but not afterwards, apply to the probate court having jurisdiction of the estate of the decedent for the abatement or repayment of said tax or any part thereof, and if the court adjudges that said tax or any part thereof was wrongfully exacted it shall order the repayment of such portion of said tax as was assessed or demanded without authority of law which said order or decree shall be subject to appeal as in other cases. Upon a final decision ordering the repayment of any portion of said tax, the state treasurer shall repay the amount adjudged to have been illegally exacted without any further act or resolve making appropriation therefor. The state treasurer, in his discretion, may abate the tax in any case if in his opinion the tax is not of sufficient amount to justify the labor and expense of its collection, and may do so without requiring executors and administrators to furnish evidence of disbursements in all cases where the total estate is shown by the inventory to be less than two hundred dollars in value.

Amend Section 6 of said bill by striking out the whole of said section and inserting in place thereof the following:

SECT. 6. Amend Chapter 40 of the Laws of 1905, as amended by Chapters 68 and 138, Laws of 1907, Chapter 104, Laws of 1909, Chapter 42, Laws of 1911, Chapters 106 and 116, Laws of 1915, and Chapter 37, Laws of 1919, by adding after Section 22 the following new sections:

SECT. 23. Whenever property, real or personal, is held in

the joint names of two or more persons, or is deposited in banks or other institutions or depositories in the joint names of two or more persons and payable to either or the survivor, upon the death of one of such persons the right of the surviving joint tenant or joint tenants, person or persons, to the immediate ownership or possession and enjoyment of such property shall be deemed a transfer taxable under the provisions of this act in the same manner as though the whole property to which such transfer relates was owned by said parties as tenants in common and had been bequeathed to the surviving joint tenant or joint tenants, person or persons, by such deceased joint tenant or joint depositor by will. To the extent that such joint account or property is acquired by the use of the funds of the persons to whom it is payable or by whom it is held, the value of the separate interest of each for the purposes of this act shall be measured by his proportionate contribution to the fund or to the purchase price of the property. SECT. 24. No person or corporation engaged in the business of renting or furnishing safety deposit boxes to its customers or others, for the safe keeping of securities or other papers, shall without the consent in writing of the state treasurer permit any person, except an executor or administrator duly appointed and qualified in this state to remove any of the contents of any such safety deposit box after knowledge of the decease of any person having the right to use the same, whether such deceased person was a resident of this state or not, except the will, if any, of the deceased which may be delivered to the executor named therein. No corporation organized and existing under the laws of this state shall transfer on its books or issue a new certificate for any share or shares of its capital stock standing in the name of a decedent, or in trust for a decedent or belonging to or standing in the joint names of a decedent and one or more persons, and no safe deposit company, trust company, corporation, bank or other institution, person or persons having in possession or under control or custody or partial control or partial custody securities, deposits, assets or property belonging to, or stand-

ing in the name of a decedent who was a resident or non-resident, or belonging to, or standing in the joint names of such a decedent and one or more persons, or which was received from the decedent for delivery to any other person, or is marked or designated for such delivery, including the shares of capital stock of or other interest in, said safe deposit company, trust company, corporation, bank, or other institution, shall, except as hereinafter provided, deliver or transfer the same to any person except a resident executor or administrator of the estate of the decedent without the written consent of the state treasurer or the assistant attorney general. Every person or corporation having the custody or control of such property shall, within 10 days after receiving knowledge of the death of the decedent, notify the state treasurer, and whenever possible prepare and transmit to him an itemized schedule of the property. Upon receipt of such notice the state treasurer in person or by the assistant attorney general or other representative, may examine such securities, deposits, assets, or the records of such safe deposit company, trust company, corporation, bank, or other institution, or person relative thereto and shall as soon as possible notify the holder of the property whether or not a tax will be claimed upon its transfer, and may by an instrument in writing consent to the immediate transfer of such property if, in his judgment, the transfer is not subject to tax. If a tax is claimed by the state treasurer under the provisions of this act the property shall be delivered to the resident executor or administrator of the deceased or held until the tax has been assessed and paid as the circumstances of the case may require, unless the treasurer's claim is overruled by the court in appropriate proceedings. Savings banks, trust companies and all other similar institutions shall when receiving deposits in more than one name ascertain and record the place of residence of the parties, and shall upon request of the state treasurer furnish him with a list of all such deposits, together with the names and addresses of the depositors, and such other information as he may require and the institution is able to furnish. Failure

to comply with the provisions of this section shall render such safe deposit company, trust company, corporation, bank or other institution, person or persons liable to a penalty of not more than one thousand dollars, and in addition thereto for the amount of the taxes, interest and penalties due under this act upon the passing or transfer of said securities, deposits, or other property, and said penalties and liabilities may be enforced in an action brought by the state treasurer.

Further amend said bill by renumbering Sections 8 and 9 so that the same shall be entitled respectively Sections 9 and 10, and by inserting after Section 7 a new section to read as follows:

SECT. 8. Amend Section 20 of Chapter 40 of the Laws of 1905, as amended by Section 9, Chapter 68, Laws of 1907, Section 1, Chapter 42, Laws of 1911, and Section 1, Chapter 106, Laws of 1915, by striking out the entire section and inserting in place thereof the following: SECT. 20. The state treasurer shall be entitled to appear in any proceeding in any court in which the decree may in any way affect the tax. No decree in any such proceeding, or upon appeal therefrom, shall be binding upon the state, and no decree shall be entered upon a petition for leave to file an authenticated copy of a foreign will and the probate thereof, or upon a probate appeal, unless notice of such proceeding shall have been given to the state treasurer.

OPINION OF SUPREME COURT.

The speaker presented the following:

SUPREME COURT
NEW HAMPSHIRE

FRANK NESMITH PARSONS

CHIEF JUSTICE

FRANKLIN

MARCH TWENTY-NINE,
Nineteen twenty-one.

Honorable Fred A. Jones,

Speaker of the House of Representatives,

SIR:

In response to yours of the 16th inst. I hand you herewith the answers of the justices to the questions contained in the resolution of the House submitted by you.

Respectfully,

F. N. PARSONS.

To the House of Representatives:

The pending bill which is submitted for our consideration appears to be modeled upon a recent Massachusetts statute. Laws, Mass. 1919, c. 289. The Massachusetts act seems to have been adopted under a recent amendment of the constitution of that state. "The General Court shall have power to provide by law for voting by qualified voters who, at the time of the election, are absent from the city or town of which they are inhabitants in the choice of any officer to be elected or upon any question submitted at such election." Art. XLV, Amendment, Const. Mass.

The purpose of the proposed legislation is to authorize the exercise of the right of suffrage at our biennial elections by electors who are not present at the polls either because of absence from the municipality in which the election is held or because of physical disability. In the latter provision the bill goes beyond the Massachusetts act or the constitutional amendment by which the legislation of that commonwealth is authorized.

The inquiry submitted is whether in the absence of power expressly given by constitutional amendment the legislature has power to provide as proposed. That such power does not exist was settled nearly fifty years ago not only in this state but in others with similar constitutional provisions as to all offices created by the several state constitutions.

In June, 1863, an act was pending in the legislature entitled "An act to secure the right of suffrage to the qualified voters of this state engaged in the military or naval service of their country," and the opinions of the justices were required as to its constitutionality. This act is identical in principle with the law now proposed. It authorized the exercise of the right of suffrage by electors who are not present at the polls; provided for prior preparation of the ballot by the voter and the presentation of the ballot to the moderator in the meeting by an attorney duly appointed by the voter, while the proposed act requires the ballot similarly previously prepared by the voter to be presented to the moderator by the town clerk to whom the ballots are to be transmitted by the voters. This law the justices advised was beyond the power of the legislature because the constitution as they construed it required "that the right of voting shall be exercised by the voter in person at the meetings duly held for the purpose in the places of the state pointed out by the constitution and at times in accordance with its provisions." 44 N. H. 633, 636. For other authorities reaching the same result see, *Opinion of the Justices*, 30 Conn. 591; 37 Vt., 655; *Chase v. Miller*, 41 Pa. St. 633; *Day v. Jones*, 31 Cal. 261; *Bourland v. Hildreth*, 26 Cal. 161; *People v. Blodgett*, 13 Mich. 127. In *Morrison v. Springer*, 15 Iowa, sustaining a statute for the same purpose but with different provisions the court expressly approved the opinions expressed by the justices of this court. Since 1863 it has been understood (as said by Ladd, J. in *Copp v. Henniker*, 53 N. H. 179, 193) "that the right of suffrage established by the constitution could not be exercised by proxy." We are not able to answer the considerations by which the conclusions of the justices were supported in 1863. Counsel who have

appeared before us in behalf of the proponents of the bill concede that it is beyond legislative power as to state offices. We therefore are constrained to advise the House of Representatives that the right of suffrage given by the constitution can not be exercised by proxy, *i. e.* by electors not present at the meeting. The occasion for legislation of this character in 1863 was the absence of many voters in the service of the army or navy of the United States during the Civil War. The difficulty was met in some states by constitutional amendment. Similar amendments have since been adopted in other states. Bulletin, Mass. Const. Convention, Vol. 2, pp. 212, 214, 219-223.

Most of the statutes adopted during the war instead of providing for voting by proxy at the place where the election was regularly held provided for special elections at the places where the electors in the service of the federal government might be. Such a law was here adopted in 1864 applicable however only to presidential electors and representatives in congress. Laws, 1864, c. 4030. The reasoning of the justices in 1863 in some portions of their opinion is apparently fatal to this law also, but with the statement that the election of federal officers was not called to their attention the justices upon inquiry from the senate expressed opinions in favor of the validity of the law of 1864. 45 N. H. 595; 37 Vt. 655. There is nothing in the opinion however expressing doubt as to the view previously expressed as to the constitutional requirements for the election of state officers. The question was as to the place where the election must be held, not whether the elector's vote could be cast in his absence.

At each of the biennial elections to which the proposed bill applies a representative in congress is elected and presidential electors and a senator in congress may be. The legislature may desire to consider the advisability of legislation of this character applying to these officers alone and we have considered this question also. This is a question not of state but of federal law and authority must be found, if it exists, in the provisions of the federal constitution. "Each state

shall appoint in such manner as the legislature thereof may direct" electors of President and Vice-President. "The Congress may determine the time of choosing the electors." Const. U. S. Art. II, s. 1. "The electors of President and Vice-President shall be appointed in each state, on the Tuesday next after the first Monday in November in every fourth year." R. S. U. S. s. 131. As the manner of making the appointment is left to the legislature of each state there can be no constitutional objection to the scheme now proposed. The power of the legislature as to this matter is discussed in the opinion of the justices, 45 N. H. 599, 601. Holding the opinions there expressed we advise the legislature that the provisions of the proposed bill so far as applicable to the choice of presidential electors, if enacted, would be a valid exercise of legislative power.

As to representatives and senators in Congress the question is not so clear. "The House of Representatives shall be composed of members elected every second year by the people of the several states, and the electors in each state shall have the qualifications requisite for electors of the most numerous branch of the state legislature." U. S. Const. Art. I, s. 2. "The Senate of the United States shall be composed of two senators from each state elected by the people thereof for six years; and each senator shall have one vote. The electors in each state shall have the qualifications requisite for electors of the most numerous branch of the state legislature." Art. XVII. Amendment U. S. Const.

"The times, places and manner of holding elections for senators and representatives, shall be prescribed in each state by the legislature thereof, but the Congress may at any time by law make or alter such regulations except as to the place of choosing senators." Const. U. S. Art. I, s. 4.

"All votes for representatives in Congress must be by written or printed ballot, or voting machine the use of which has been duly authorized by state law; and all votes received or recorded contrary to this section shall be of no effect."

R. S. U. S. s. 27, Laws, Feby. 14, 1899, c. 154, 30 St. 836; Comp. St. s. 24.

The advice given in 1864 (45 N. H. 595) that voting for representatives in Congress could be authorized at places other than those in which the voter was by the state constitution qualified to vote was based upon the proposition that the place where a voter was qualified to vote was no part of his qualifications as an elector. Giving a narrow construction to the term qualification it might be concluded that the requirement of the state constitution that the voter should present his vote in person related merely to the manner of voting and not to the qualifications of a voter. But the elector is not capable of voting for members of the most numerous branch of our legislature unless he is physically capable of attending the meeting and is there present in person. The requirement of the federal constitution that the electors of senators and representatives should possess the qualifications of electors of a class of legislators in the state would seem to imply that only those who by state law were permitted to vote for such legislators should have the right to vote for candidates for the federal offices. The statute quoted requires representatives in Congress to be elected by ballot. "A ballot may be defined to be a piece of paper, or other suitable material, with the name written or printed upon it of the person to be voted for; and where the suffrages are given in this form, each of the electors, in person, deposits such a vote in a box or other receptacle provided for the purpose and kept in the custody of the proper officers." Cush. Leg. Ass. s. 103; quoted with approval, Cooley's Const. Lim. *604. That at common law in all elections of a public nature every vote must be personally given is a proposition upon which the authorities are uniform. Authorities cited, 44 N. H. p. 635; Morawetz Private Corp. s. 486; McCrary Elections, s. 48; Paine on Election, s. 462; Richards Case, Clark & Hall; Cong. El. Cases, 95, 99. Congress has also fixed the day for the election of senators and representatives. R. S. U. S. s. 25; Act June 4, 1914, c. 103, s. 1, Comp. St. s. 14a.

If the election is to be held on a certain day the implication is that the vote must be cast on that day. The bill before us permits the voter to part with all control over his vote, to vote in short as early before the day of election as he can obtain a ballot. It seems most probable that Congress, when it required an election by ballot meant an election where the ballot was presented by the elector in person and we incline to the opinion that the scheme of this act for voting by proxy would not be a valid law, it enacted, as to the election of representatives and senators in Congress, As each House of Congress is judge of the elections and qualifications of its members the question can only be determined by those bodies. We have not found such a decision.

Although advisory opinions such as we now are giving are not judgments establishing the law, in practice they appear to be relied upon as authority as fully as decisions in litigated cases. Whenever possible it has been the practice in recent years to hear arguments from parties holding opposing views. The practical result is that these opinions have in effect the weight of declaratory judgments upon questions within the jurisdiction of the court of which the justices are members. In the opinion in 45 N. H. the fact that the question is one not within the jurisdiction of the judiciary of the state is not referred to. But our duty to advise under the constitution is not limited to questions which may be adjudicated by the courts of the state. *Opinion of the Justices*, 60 N. H. 585. In that case the justices advised as to the legality of the election of a United States senator by the existing legislature, a question which could be finally determined only by the senate.

It is often said that a court will not declare beyond legislative power a law which has been duly enacted unless the conflict with the constitution clearly appears. In the present case where we are asked to advise as to legislative power in advance of action upon a question not within the jurisdiction of the state it is clear we can not safely give advice which might induce affirmative action unless the power clearly exists. We have such doubt as to what might be

held by the final authority as to the validity of an election of a senator or representative in Congress which depended upon votes given by proxy as now proposed in a state where that method of voting is not permitted by state law that we are unable to advise the legislature that the proposed legislation would be valid. We are not aware of any emergency which requires action by the legislature at this time. Our opinion if expressed that the law is valid or invalid in this respect will not decide the question. Whether it is wise to proceed with legislation of at least doubtful validity is a question of expediency determinable only by the legislature. Our duty is performed by stating the legal situation as it exists.

To restate our conclusions—The manner of voting prescribed by the bill is contrary to the state constitution and its provisions would be invalid as to the election of state officers; they would be valid as to the election of presidential electors; we are unable to say the provisions would be held valid as to the election of senators and representatives in Congress.

have operated at a profit, whether or not the loss, if any, that is chargeable to the railroads situated in New Hampshire is as large in proportion to mileage as the loss chargeable to the operation of that part of the Boston and Maine system situated outside of New Hampshire; also, whether or not the accounting of the Boston and Maine management credits to the several leased lines situated in New Hampshire the full amount of receipts that the business done by those lines are entitled to be credited with; also, what part, if any, of the losses sustained by the Boston and Maine system, taken as one operating unit, is charged up to railroads situated in New Hampshire which are operating at a profit; also, whether or not an unfair proportion of overhead expenses of the Boston and Maine system are charged to the New Hampshire lines, taking into consideration the mileage of New Hampshire lines and those parts of the system situated outside of New Hampshire; also, whether those railroad stations in New Hampshire which the Boston and Maine has discontinued service at or is contemplating a discontinuance of service at, have shown a loss in operation during all of the last six years or an average loss over the six-year period.

The eliminated districts shall be those in which payments for current local expenditures for public education, as measured in dollars and cents per one thousand dollars of equalized valuation, were, during the previous year, the lowest;

except that the state board shall have authority in its discretion to withhold from such general distribution an amount not exceeding five per cent of the appropriation for state aid which it may use to furnish additional aid to districts where special need exists. As the term is used in this act the equalized valuation of a school district is the equalized valuation of the city or town of which it is composed; and in a city or town comprising more than one school district, the equalized valuation of any district shall be such a fraction of the equalized valuation of the whole city or town as the assessed valuation of the district is of the assessed valuation of the whole city or town. The eliminated districts shall be those in which payments for current local expenditures for public education, as measured in dollars and cents per one thousand dollars of equalized valuation, were, during the previous year, the lowest; except that the state board shall have authority in its discretion to withhold from such general distribution an amount not exceeding five per cent of the appropriation for state aid which it may use to furnish additional aid to districts where special need exists. MESSAGE FROM THE GOVERNOR.

His Excellency, the Governor delivered the following message:

Mr. Speaker and Members of the House of Representatives:

In response to a resolution of this house, the chairman of the Committee on Appropriations has submitted a statement of the requests made by the various state departments and institutions for maintenance and other expenses for the fiscal years 1921-22 and 1922-23, and also an estimate of the special requests presented to the legislature. This report, as you have observed, goes sufficiently into detail and gives full information.

In the first place deficiency appropriations are sought by ten departments and institutions to carry them through the current year, that is, the year which began on the first day of September, 1920. The deficiencies amount to \$472,000, seventy-five per cent of which is due to the operations of two of the departments and institutions and none of which is chargeable to the two years for which it is the chief business of this administration to provide. It may be remarked in passing, and with no reflection upon any individual, that without the consent of the governor and council or that of some other body authorized to give consent, it ought not to be possible to place the state in a position from which it can extricate itself only by means of large

deficiency appropriations. If it is the fault of the system, the system should be changed.

We now come to our own province. For the year 1921-22 the estimates of the departments and institutions together with the special appropriations asked for amount to \$4,772,000 and for the year 1922-23 to \$3,696,000. There have been some reductions of these figures by those who furnished them, but they are doubtless much more than offset by the large number of requests which ask for no definite amount.

The state derives some income from the railroad and certain other property and excise taxes as well as from various lapses, fines, fees and the like. Subtracting these sums, the total of which varies only slightly year by year and equals about \$1,300,000, from the above totals and there remain to be raised by a direct state tax \$3,471,000 for the first and \$2,474,000 for the second of the two years for which this administration is primarily responsible.

But the state tax has never assumed such proportions. Fifteen years ago it was only \$300,000 and five years ago only \$800,000. It is higher this year (1920-21) than ever before with a single exception and amounts, including a special recognition tax of \$200,000, to \$1,700,000. And that is all it should amount to in either of the two years for which it is your normal duty to appropriate. It is gratifying to know that you have in substance so voted.

I owe my office to the position I have long held with regard to economy in public affairs and to the professions I have made in that regard. Many of you, a large majority perhaps, are similarly situated. Shall we keep the faith? Shall we do economy as well as talk it now that we have the opportunity? There is but one answer.

Manifestly the present is no time for large commitments. We have entered a period of falling prices. Food products have already declined one third. Other commodities are taking the downward course. Even the cost of building construction, now almost prohibitive, will again be normal. It is plain there is much to be gained by enterprises that can wait.

According to a tradition, which in some quarters is accepted for truth, there was about three weeks ago "a great and solemn referendum" in New Hampshire. On that occasion, so it said, the state decided not to resort to a new and swollen source of revenue which lay close at hand, but wholly to rely upon those ancient fountains which, like sugar maples, are tapped every spring and thoroughly drained of their liquid wealth. Some of us were not overjoyed at the result but we recognize our master's voice and cheerfully acquiesce as becomes good citizens and faithful public servants. In the discussion that preceded the plebiscite it was argued, among other things, that the legislature, which you compose, could not be trusted to establish new taxes lest the proceeds be misappropriated and squandered. This slander you can easily rebut by making a record for care and economy. We promised our constituents such a record. Now let us keep the promise.

Present taxes should not go up. They should come down. A rate of nearly four per cent upon a full valuation of the property assessed, which obtains in some towns, is oppressive if not confiscatory. Therefore, existing appropriations cannot be increased by you without imposing upon the owners of taxable property a greater burden than they can be expected to bear.

In view of the foregoing, I ask you to stand with me for moderate appropriations and a conservative state tax, such as, I am confident, your Committee on Appropriations will recommend. Even then, with careful management and no expansion, there should be money enough to go around and none of the state's activities should come to want.

Having wisely legislated against the destructive use of the highways, you may well provide for their maintenance. There is pending in the House a bill relating to motor vehicles with this end in view. If it becomes a law without reduction of the registration fees named therein, a plain and efficient method for the upkeep of our roads, so far as the state is concerned, will be provided outside of general taxation. No principle is plainer than that the highways should

be supported by the traffic they bear, and that to the heavier and more destructive traffic should be assigned the principal burden. I, therefore, urge the passage of House Bill No. 283 without substantial reduction of the fees named therein.

SECT. 7. Except as herein otherwise provided, no person shall operate a motor vehicle within this state until he shall have first obtained a license for that purpose. Application to operate motor vehicles may be made by mail or otherwise to the commissioner on blanks prepared under his authority. Application for license to so operate shall be accompanied with the proper fee as provided for in Section 25.

Before a license is granted to any person, except to a non-resident, who has not been heretofore licensed to operate a motor vehicle in this state, the applicant shall pass an examination as to his qualifications, which examination shall be such as the commissioner shall prescribe, and no license shall be issued until the commissioner is satisfied that the applicant is a proper person to receive it; *provided, however,* that if an applicant for a license to operate motor vehicles under the provisions of this section has been granted a non-resident certificate as provided in Section 25 of this act for the current year, the commissioner may issue such license without an examination.

Special licenses shall be issued to chauffeurs who have passed a chauffeur's examination, but no such license shall be issued to any person less than eighteen years of age.

Every person licensed to operate motor vehicles as aforesaid shall endorse his usual signature on the margin of the license, in a space provided for the purpose, immediately upon receipt of said license, and such license shall not be valid until so endorsed.

All licenses to operate motor vehicles shall expire at midnight on December thirty-first of the year of their issue.

All applications for licenses to operate motor vehicles shall be sworn to by the applicant before a justice of the peace or a notary public.

Amend Section 13 of said bill by striking out the period (.) after the word "only" in line 16 and inserting in place thereof (;) and adding the following: "*further provided*, that the provisions of this section relating to speed shall not apply to motor vehicles of a fire department, motor police patrols, or motor ambulances, when in the emergency service of their respective departments" so that said section as amended shall read as follows:

It shall be conclusive evidence of a rate of speed greater than is reasonable and proper as aforesaid if a motor vehicle is operated on any way inside the thickly settled or business part of a city or town at a rate of speed exceeding fifteen miles per hour for the distance of one-eighth of a mile, or if a motor vehicle is operated on any way upon approaching an intersecting way, or in traversing a crossing or intersection of ways or in going around a corner or a curve in a street or way where the operator's view of the road traffic is obstructed, at a rate of speed exceeding ten miles per hour; *provided, however*, that in civil actions this evidence shall be *prima facie* only; *further provided*, that the provisions of this section relating to speed shall not apply to motor vehicles of a fire department, motor police patrols, or motor ambulances, when in the emergency service of their respective department.

Amend Section 14 of said bill by striking out the word "motor" before the word "vehicles" in lines 3, 11 and 14; further amend said section by striking out in lines 14 and 15 the following: "or which excludes such vehicles therefrom, or which governs or restricts the use of such vehicles" so that said section as amended shall read as follows:

SECT. 14. Selectmen of towns, city governments, or any board, department or commission in any town or city, having jurisdiction of the subject matter, may make special regulations as to the use of vehicles upon particular ways, except as to speed, and may exclude such vehicles altogether from certain ways; *provided, however*, that no such special regulation shall be effective unless it shall have been published in one or more newspapers, if there be any in the city or town in which the way is situated, otherwise in one or more newspapers published in the county in which the city or town is situated, nor unless notice of the same is posted conspicuously by the city, town, board, department or commission making the regulation, at points where any way affected hereby joins other ways but no regulation shall be valid which excludes vehicles from any state highway or from any main highway leading from any city or town to

another. No ordinance, by-law, or regulation now in force in any city or town or in any parkway or park which regulates the speed at which vehicles shall be run upon its way, shall hereafter have any force or effect.

A conviction of a violation of this section shall be reported forthwith by the court or trial justice to the commissioner, who shall revoke immediately the license of the person so convicted and the commissioner may revoke the license of any person who shall be convicted of a similar offense by a court of any other state. Whenever any person so convicted appeals, the said commissioner shall suspend forthwith the license of the person so convicted and shall order him to deliver his license to said commissioner, and shall not reissue said license until said person is acquitted in a court having jurisdiction of the offense charged. No new license or certificate shall be issued by said commissioner to any person convicted of a violation of this section until after sixty days from the date of such final conviction.

All expense incurred in providing and maintaining such suitable protection of all persons at said crossings shall be apportioned by the public service commission between the two roads as they may deem just; and in all cases, unless otherwise ordered by the commission, when a street railway crosses a steam railroad at grade, every driver of a car upon the street railway shall, when approaching the point of intersection, stop his car not more than seventy-five feet and not less than twenty feet from the crossing, and before attempting to cross carefully

In case of any disagreement as to the necessity and extent of such alterations, the same shall be determined by the public service commission, whose decision shall be final. Whenever it shall be necessary to repair, alter or rebuild a bridge or construct a new bridge, upon a public highway, and said bridge is, or shall be used by a street railway, at the expense of such repairs, alterations, rebuilding or construction may be apportioned equitably, as the public good may require, between the town incurring such expense and such street railway, by the superior court upon petition brought therefor by the town, unless the said town and the said street railway shall agree upon such apportionment. Upon petition of a street railway company whose tracks cross the track of a steam railroad at grade, or upon petition of a steam railroad company whose tracks have been crossed at grade by a street railway, the public service commission may review the apportionment of the expense incurred in providing and maintaining suitable protection of all persons at any such crossing as provided in this section and may make such new order of apportionment or such order requiring either

company to defray the entire expense of providing and maintaining such protection as said commission may consider just and reasonable, having due regard to the nature and extent of the hazard caused by each company against which such protection is needed and the nature and extent of the benefit, if any, which each company derives from such protection."

The Speaker read the following:

PUBLIC SERVICE COMMISSION
OF
NEW HAMPSHIRE

CONCORD, APRIL 13, 1921.

*To the Honorable House of Representatives of the State of
New Hampshire:*

The resolution passed by your honorable body, asking the Public Service Commission to furnish you with detailed information in regard to financial results to the Boston & Maine Railroad from the operation of its lines in New Hampshire, was handed to the commission only this morning. As the legislature has voted to adjourn tomorrow, April 14, at 5 p. m., it can readily be seen that the time is too limited to enable us to get out a satisfactory report on this resolution even if we had the necessary data on file in our office with which to do so, which we have not.

The Boston & Maine Railroad files with the New Hamp-

shire Public Service Commission as its annual reports, a duplicate of the annual reports which it files with the Interstate Commerce Commission. The Interstate Commerce Commission does not require the railroad to report in detail or generally the result of its operations in the various states, and, therefore, its annual reports show only the result of its operations as a unified system. Doubtless the information asked for in a large part, at least, is obtainable from the records of the railroad, but to obtain it would involve a good many clerks and accountants for a considerable length of time. To make the necessary research and investigation would cost considerable money, the exact amount of which we are unable to state. We assume this is not your desire as no appropriation was made for that purpose.

What we understand the legislature desires in a general way is to know definitely whether or not the railroad business done in New Hampshire is a paying proposition. In other words, is the management using what is made in New Hampshire to make up for losses incurred in other states.

In 1911 the New Hampshire Public Service Commission ordered the railroad to report not only its total operating revenues and expenses but the operating revenues and expenses attributable to New Hampshire business. This caused so much expense and labor to the railroad that this order was not kept in force after the year ending June 30, 1913.

For that year, however, the report showed as follows:

OPERATING REVENUES		
	<i>Entire line</i>	<i>State of New Hampshire Total revenues</i>
Total operating revenues.....	\$48,513,507.35	\$10,907,266.54
Total operating expenses.....	38,101,424.62	8,993,425.38
Ratio of operating expenses to operating revenues, per cent..	78.54	82.46

Of course it is a long cry from 1913 to 1921, but assuming that the same system prevails now of keeping its accounts that prevailed then and that conditions remain unchanged, it is fair to conclude that the New Hampshire lines as a whole are not carrying any more than their fair share of the burden.

To determine what particular lines, if any, in New Hampshire are paying and what are losing propositions, what revenue was derived for the past six years from the rural stations recently closed, and to answer other various questions embraced in said resolution would require a detailed study of the company's books and records which the short time before adjournment does not permit of even though we had the means at our disposal to finance such an undertaking.

It is interesting to note that the total mileage of the Boston & Maine Railroad is 2,257.85, while the total mileage within the state of New Hampshire is 1,020.01.

If it be the desire of the governor and council that we furnish them at a later date more detailed information called for by said resolution, we shall cheerfully comply with a request to that effect.

Respectfully submitted,

N. H. PUBLIC SERVICE COMMISSION,

WILLIAM T. GUNNISON,
THOMAS W. D. WORTHEN,
JOHN W. STORRS,
Commissioners.

On a *viva voce* vote the motion prevailed.

Mr. Howes of Manchester called for a division.

A division being had, the vote was declared manifestly in the affirmative and the bill was indefinitely postponed.

The message further announced that the Senate had voted to adopt the amendments offered by the Committee on Engrossed Bills, to the following House Bill, in the adoption of which amendments, the Senate asked the concurrence of the House of Representatives:

the actual performance of duty; or any employee who has reached the age of sixty years and has had thirty consecutive years' service; and may grant a pension to such retired employee for a period not exceeding one year at a time. No such employee shall be granted a pension unless it shall be certified to the department of highways in writing by the city physician, that such employee is permanently incapacitated physically from performing his duty as an employee of the department. Consecutive years under the terms of this section shall not be interpreted to disqualify those candidates for pensions who may have been laid off temporarily from work by the department of highways from time to time.

COMMITTEE REPORT.

Mr. Murdock of Hill, for the joint committee appointed to wait upon His Excellency, the Governor, and inform him that the legislature had completed its duties, reported that they had attended to their duties and that the governor informed them that he had a communication to lay before the House.

The report was accepted, and immediately His Excellency, Hon. Albert O. Brown, Governor, appeared before the House and delivered the following message:

To the House of Representatives:

No recent legislature has passed so few laws as this of 1921. None has rejected so large a percentage of all the measures introduced. Out of 527 bills and resolutions, 283 have become laws; and 244 have failed to pass. It is the quality, not the quantity, of your work, that will commend it to your constituents.

Among the acts of the session of major importance are the enactments providing for continuing boards of selectmen; for the maintenance of highways by the traffic they bear and for their protection against destructive use; for the improvement of the school law and some reduction in the cost of its operation; for the closing of certain jails; for the equalization of salaries paid by the state; and for the payment of fees and other income into the state treasury.

Extensive provision has been made for continuing the fight against tuberculosis in men and animals. The Sunday law has been retained, unimpaired, upon the statute book. The state's greatest highway has been named for her most distinguished son. The aid of the state has been extended to the city of Manchester to supply a need where local government, for the time being, had failed. Various commissions have been created to serve without pay in the interest of the state.

The appropriations provide for necessities only, and not for luxuries. They are reflected in a deficiency tax of \$450,000 for the current fiscal year; a state tax of \$1,700,000 for the next year; and of \$1,500,000 for the year following that.

This result should mark a turning point in taxation. Your work in bringing it about is extremely gratifying to me, and in return, I promise you the money appropriated shall be expended with the utmost care and prudence, and that, so far as it can be prevented, no deficiency will be permitted to accrue.

I desire to thank you in behalf of the people of New Hampshire, whose servants you are and to whom you are about to return, for the general excellence of your record in legisla-

tion, and for the earnest and orderly manner in which, under a capable and efficient presiding officer, you have proceeded with your work. I also thank you for your splendid co-operation with me and for your kindness and courtesy to all with whom the public business has brought you into contact.

Having been informed by the joint committee of the Senate and the House of Representatives that you have completed the business of the session and are ready to adjourn, I do, by the authority invested in me as Governor, hereby declare the General Court of New Hampshire adjourned to the last Wednesday in December of the year of Our Lord, one thousand nine hundred and twenty-two.

ALBERT O. BROWN,
Governor.

Thereupon the Speaker declared the House adjourned to the last Wednesday in December, 1922.

Clerk.
